

TROPICAL BIRDING

Thailand Custom Tour

21st March – 3rd April, 2010

Tour leader: Charley Hesse
Report by Charley Hesse & Marcia Balestri.
Photos by Charley Hesse

We timed this custom tour to overlap with the southern extension of the set departure tour. This enabled us to join another group for forest birding in the south where we picked up some real gems like Ratchet-tailed Treepie, Long-tailed & Green Broadbills and Banded Pitta. We also spent an additional week at 3 fantastic mountainous sites in the northwest where we found some hard-to-see species including Hume's Pheasant, Giant Nuthatch, Collared Falconet, Black-tailed Crake, Red-faced Liocichlas, 3 species of forketails, 4 species of wren-babblers and many other special birds. Some opportunistic shorebirding scored us the mega Spoon-billed Sandpiper and we finished at Chiang Saen on the Laos border adding River Lapwing and Small Pratincole along with a host of freshwater aquatic species. Covering such a wide range of habitats and geographical areas helped us reach an incredible 350 species in just 12 days.

22nd March – Pak Thale to Kaeng Krachan National Park

After an early buffet breakfast we paid another visit to the salt pans at Pak Thale where we had ‘dipped’ on the mega **Spoon-billed Sandpiper** at the start of the set departure tour. After lots of standing, scanning, and teetering along on narrow dykes, we met with success! It was a bit distant, but definitely a Spoon-billed. We didn’t dwell as the others had already birded here thoroughly, but we still picked up **Indian** and **Little Cormorants**, lots of **Eurasian** and **Far Eastern Curlews**, **Black-tailed Godwits**, four species of plover, **Temminck’s Stint**, **Common Greenshanks**, **Ruff** and **Marsh Sandpipers**. **Brown-headed Gulls** loafed on a sandspit, and **Little** and **Whiskered Terns** played along the various shorelines. On the way out along the roadside, we stopped to see **Asian Pied Starlings**, **Black Drongo**, **Indochinese Bushlark**, **Oriental Pratincole**, **Black-capped Kingfisher** and **Plain-backed Sparrow**.

We moved on to the original itinerary, driving to Kaeng Krachan National Park. The habitat here is similar to Khao Yai National Park, mixed deciduous grading into broadleaf evergreen at higher altitudes. There is also overlap in birds, but some new ones are here and some of the ones that are hard to see at Khao Yai are easier to find here. We made a pit stop along the way and saw a **Black Baza** overhead and 2 **Hoopoes** playing in the distance. We made it to the comfortable Baan Maka lodge, on the edge of the Kaeng Krachan National Park. Our home for the next 2 days. We birded the wonderful gardens for half an hour before lunch and picked up **Gray-rumped Treeswift**, **Indian Roller**, **Dollarbird**, **Bar-winged Flycatcher-shrike**, **Black-naped Monarch**, **Ruby-cheeked Sunbird** and **Black-naped Oriole**. We had open-air lunch where they served us many delicious dishes of Thai food while we watched **Lesser & Greater Necklaced Laughingthrushes** and **Orange-bellied & Scarlet-backed Flowerpeckers** come in to the fruit feeders nearby. Lots of Bulbuls congregated, and we also saw a **Northern Tree Shrew** on the ground scarfing up the leftovers.

In the afternoon we rode up to Kaeng Krachan National Park birding mainly along the roadside. We heard some thunder and some clouds rolled in, so the temperature was a little cooler. On the way we were lucky enough to see a **Chestnut-winged Cuckoo** fly across the road and we all jumped out to get a better look. Just past the entrance to the park we saw **Striated Heron** on a small lake plus **Blue-throated Bee-eater** and **Forest Wagtails** along the road. After this, we had several very productive stops, adding **Emerald Dove**, **Asian Barred Owlet**, **Great Hornbill**, **Green-eared & Blue-eared Barbets**, **Lesser Yellowname**, **Common Flameback** and **Great Iora**. We finally reached the campground, where Dusky Langur monkeys romped about and put on quite a show. A couple of people also spotted a **Yellow-rumped Flycatcher** which quickly disappeared so nobody else could get on it. It did however reappear and we worked hard to make sure everyone eventually saw it. The drive back we had views of flying **Large-tailed Nightjars**. Back at Baan Maka, we cooled off with a shower and a beer before a delicious Thai dinner was served. We did our checklist for the day, which was the biggest day list of the trip for all of us.

Indochinese Bushlark

Black-capped Kingfisher

Dusky Langur

23rd March – Kaeng Krachan National Park

The grounds were very birdy and the setting is nice, so the photographer amongst us decided to stay behind for the day. After an extra early breakfast, the rest of us piled into the back of our 2 x 4-wheel drive trucks and off we went. We went through the park and past the campground. There were only certain times in the morning you can go up the road past the campground, and certain times in the afternoon you can go down, so we were trying to keep to a schedule. We did stop at one point, to get a look at a **Blue-eared Kingfisher** which unfortunately flew off before the whole group got on it. The weather was pleasant and the road was OK. Paved in some spots, and gravel in others but we needed 4-wheel drive for the 3 or 4 stream

crossings and the steeper sections of the road. We got to the point to bird and started a walk. Birding was pretty good and we saw **Orange-headed & Siberian Thrushes, Yellow-bellied Warbler** and the interesting **White-hooded Babbler**. We hit the upper campground, spent some time there, and then went several more miles along a ridge to the end where the views were great. A **Great Hornbill** flew by at one point, and we were looking down on him for a change. At the overlooks, we saw many raptors, including: **Crested Serpent-Eagle, Crested & Chinese Goshawks, Gray-faced Buzzard, Booted Eagle** and **Changeable Hawk-Eagle**. Thanks to our assistant and the driver, we also found a truly stunning **Red-bearded Bee-eater** and **Black-and-yellow Broadbill**.

We had lunch back at the upper camp site and had some very productive birding nearby, with **Little Cuckoo-Dove, Blue-winged Leafbird, Blue Rock-Thrush**, an awesome male **Ultramarine Flycatcher, White-browed Scimitar-Babbler**, a pretty little **Velvet-fronted Nuthatch** and a flowering tree attracting **Spectacled & Streaked Spiderhunters**. On the way back down, our birding mode on the road was to drive along until we heard something, and we would pile out the back of the pickup. On the upper part of the road we had our best views of **Gray Treepie, Red-throated Barbet & Lesser Racket-tailed Drongo**. However, our target birds here were Ratchet-tailed Treepie and any broadbills. We ran into a famous British birder living in Thailand, who said that the **Ratchet-tailed Treepie** was calling a little lower down so we made a stop for a second try. We worked hard to find the bird, and finally all got on it. Normally a very difficult species to see. We also all saw the spectacular **Long-tailed Broadbill** that seemed to be in the same flock.

Our assistant, End, knew where a **Brown Hornbill** nest was so we stopped to take a peak. The male never showed up, but the female and chick poked the tips of their bills out. Not great views, but good enough to put on the list. We stopped at the spot where we saw the kingfisher before so everyone could have a chance, but a photographer was in the spot taking photos of butterflies. Also in the lower part of the park we picked up **Black Baza, Black-capped Kingfisher, Ochraceous Bulbul** and a flock of colourful **Green Magpies**. We finally got back to Baan Maka after a long, dusty day. We took our showers before dinner, and our photographer showed his photos to put some names on the birds he saw on the grounds. After another delicious meal, we did the checklist and all trundled off to bed.

Black-and-yellow Broadbill

Ultramarine Flycatcher

Streaked Spiderhunters

24th March – Kaeng Krachan National Park to Khao Nor Chuchi

We all loaded up, leaving Baan Maka early to head for the Bangkok airport and on to Krabi, a town in the southern part of Thailand. The heat when we arrived was oppressive. When we got outside we were immediately drenched in sweat. Traveling in 2 (mercifully) air-conditioned vans, we set off to the Morakot Resort, our home for three nights. The cabins at Morakot were basic but sufficient for our needs and certainly well located. We arrived at the resort in time for lunch, which was a really good assortment of Thai dishes with rice. The staff here were ultra nice and accommodating. We rested then birded the grounds a little. It was pretty quiet but we did find **Brown-throated Sunbird, Black-headed Bulbul, Asian Brown Flycatcher, Dark-necked Tailorbird**, and **Orange-bellied Flowerpecker**.

In the afternoon we went out birding, walking along a track and then a trail through the forest. We heard the distinctive calls of **Red-throated & Blue-eared Barbets** and also saw a nice selection of birds including: noisy **Ochraceous & Yellow-bellied Bulbuls**, pretty **Ruby-cheeked & Purple-throated Sunbirds, Red-eyed Bulbul** in the top of a tangly tree and a **Little Spiderhunter**. We heard **Gurney's Pitta**, our target bird for this leg of the trip. I couldn't believe we had found it so quickly. It came close and it moved across through some dense brush in front of us but unfortunately no one really saw it. It was frustrating but as it was vocal, we hope to have other chances in the next few days. Next we heard a **Banded Pitta** and got it

to come in. It walked all around us in a wide circle and went across path we were standing on. It paused for a second on the side of the path, where some of our group had great views. Later we tried a bit of owling but didn't hear anything. After dinner a couple of us walked up to a Thai fair in the evening that was down the street from our resort.

25th March –Khao Nor Chuchi

We spent the morning hiking one of the main trails at Khao Nor Chuchi. We didn't see great numbers of birds, but the quality was good. Trail A is a wide track meaning that it was easier for everyone to see birds. Along here we picked up some great birds including a very vocal **Moustached Babbler**, a female **Tickell's Blue-Flycatcher**, **Striped Tit-Babbler**, **Purple-naped Sunbird**, **Crow-billed Drongo** (completing our drongo clean-sweep) and jaw-dropping male **Green Broadbill**. The trail is a popular one with Thais and tourists because it leads to the Emerald Pool, where you can swim in the cool clear water, and the Blue Pool. Between the 2 pools is a boardwalk through a clearing that was especially productive. Here we saw **Black Baza**, **Crested Goshawk** & **Wallace's Hawk-Eagle** soaring over, **Ruby-cheeked Sunbird** & **Vernal Hanging-Parrots** perching on bare branches, many **German's Swiftlets** flying over head and an amazing flowering bush busy with **Thick-billed**, **Yellow-eared** & **Gray-breasted Spiderhunters**, plus **Crimson-breasted** & **Yellow-vented Flowerpeckers**. It was so peaceful walking in, and so boisterous coming back out. The vendors had set up by now and they were selling food where some of us tried a cool coconut. Before heading back, we took a short walk down a quiet path, and found a beautiful **Black-backed Kingfisher**, a real forest gem. Back to the van for a short ride to Morakot for lunch.

We headed back out at 3pm to try for the pitta again but instead of walking the same trail as yesterday, but we took a different route where we saw more quality birds even though this time of day is very quiet. Back at the pitta site, **Banded Pitta** was finally heard calling and we crawled off the trail to the edge of a small gully where we waited to see if it would come any closer. **Orange-breasted Trogon** & **Red-crowned Barbet** were also calling nearby but none came in and we had to go back empty handed. On the way back, we were quite privileged to see the white phase of the **Asian Paradise-Flycatcher**. It is a magnificent looking bird, all white and a long streamer tail. You wonder about natural selection as it seems ripe for the taking. We saw the regular form too which was still pretty magnificent. We also saw **Cream-vented Bulbul** and frustratingly short glimpses of Rufous-winged Philentoma. We arrived for dinner a little after 6pm and did our checklist. The power went out just about the time we finished up. We went out to find frogmouths and owls at a nearby hot springs park. Our driver basically bribed the security guard at the front gate to get in. We walked along a nice concrete boardwalk and heard a frogmouth but didn't see it. No owls either. The power was on when we got back but not for long, meaning a hot night's sleep.

Tickell's Blue-Flycatcher

Green Broadbill

Asian Paradise-Flycatcher

26th March –Khao Nor Chuchi

We had another early breakfast after a hot and fitful night's sleep. Today the plan was to do Trail B. The birding is tough here. You can hear things and sometimes see things flit, but getting on the bird is another story. We started on the wide track where we saw **Siberian Blue Robin** and **Black-capped Babbler** before moving onto the narrower trail where things go even tougher. After a lot of effort, everyone saw the interesting **Hairy-backed Bulbul** and most, the beautiful and diminutive **Rufous-backed Kingfisher**, but after that several good birds were only seen by a lucky few. A **Crested Serpent-Eagle** circled above the canopy and a **Diard's Trogon** teased us for a long time and offered the briefest of views to those of us looking in the right direction at the right time. **Scarlet-rumped** & **Orange-breasted Trogons** and **Gold-**

whiskered & Red-crowned Barbets were only heard. On the walk back, we had slightly more success seeing **Greater & Lesser Green Leafbirds, Chestnut-rumped Babbler, Thick-billed Flowerpecker, Dark-throated Oriole** and great views of **Red-throated Barbet**.

Back to Morakot for lunch and a siesta, after which we sat watching a flower in the garden for 20-30 minutes in hopes that a Red-throated Sunbird would appear, but it was not to be. We all piled back into the van at about 3:30pm for another round of pitta-hunting. Again birding was slow, low numbers, but high quality when we did find something. We tried again for Gurney's and Banded Pitta, but didn't hear a peep. We really missed our opportunity day before yesterday when they were calling. For the 2 days before we arrived, it had rained constantly which is what must have got them so vocal. But since then it hadn't rained a drop. It threatened rain now with lots of big rumbles, but it never came. It would have been welcome. This morning was cooler than yesterday, but the afternoon was hot and very still. We did pick up **Bar-winged Flycatcher-shrike** and a nice **Buff-rumped Woodpecker** although most of the group only saw it in flight.

Our driver was waiting for us when we got back, and some of us returned to the park to do some owling, whilst others went back early to relax. Off we went down the road in search of something, anything! We finally heard a Brown Wood Owl, but we never could get on it. We finally headed back to Morakot for dinner where we joined the rest for a beer and rehash the day's trials. We did the checklist and just as we got through, the power went off again. We had to take showers in the dark and the water was cold, but once you got used to it, it was refreshing.

Boat trip around the mangroves at Krabi

27th March – Krabi to Doi Inthanon

The power finally came back on sometime during the night and the room was cool by the time we got up to pack and get ready to leave. A quick breakfast before we set off to the town of Krabi for a boat ride through the mangroves. We were loaded in 2 separate longtail boats. These narrow, wooden boats are indeed very long and powered by a motor mounted on a long drive shaft. The 2 boats made their way through the mangroves looking for kingfishers, **Mangrove Pitta** and **Mangrove Whistler**. We motored down the wide river pretty fast, heading towards some smaller back creeks. We would get to the entrance of one of these inlets, listen, and if we heard the bird, they would paddle us back up into the mangroves. These pittas were calling everywhere, but nearly impossible to see. We had a few other birds along the way including **Striated Heron, Common Sandpiper, Little Egret** and a **Common Flameback** that flew ahead of the boat. Long-tailed Macaques were also common along the banks of the river. Some of us saw a **Brown-winged Kingfisher**, a real mangrove specialty. There were other small birds flitting in the upper story. We were listening for Ashy Tailorbirds but only saw **Dark-necked Tailorbird**. We heard several **Mangrove Whistlers** but didn't manage to see any.

We tried several places for the pitta and it seemed like every time we would get close to one, it would move further away. The two boats tried to stay together but got separated. Once we went up one very narrow inlet where the pitta was calling, and after a short time the bird flew and some of us saw it. Our pilot jumped over the side and guided the boat up around a particularly narrow area, so we could see around the corner. We moved up to the front, and the bird flew a short distance over to a mangrove root to perch for us. It was bigger than expected and had a lovely shade of blue. It also has white wing patches that flash very obvious when it flies. The other boat showed up too late and missed it. They tried another spot, but had no luck. Unfortunately, since we had a plane to catch, we had to move on. Our last bird was the striking **Brahminy Kite** which flapped by on the way back. After a short drive to the airport, we all got checked in, had some sandwiches and juice for lunch and relaxed a bit before our flight. In Bangkok, we parted ways with the Ohio group, hoping to see some of them up there in May.

So, we are down to 3! We checked our luggage back in and checked in. The flight to Chiang Mai lasted about an hour, as did the drive to the Inthanon Highland Resort near Doi Inthanon, the highest mountain in Thailand. It had been a long day. Our driver, Tony, met us at the gate as promised, and we loaded up the van and headed for our home for the next 3 nights. Stopping for supplies and a new camera lens. The three of us had the whole van to ourselves, and we just don't know what to do with all the room. We got to the resort about 8pm, dumped our stuff, and met right away for a delicious Thai dinner. We didn't linger too long as it was getting late, and we have to get up early tomorrow.

28th March – Doi Inthanon.

After another early breakfast, we were off to bird Doi Inthanon, the highest point in Thailand at over 8,400 feet. The name Doi Inthanon was given in honor of one of the last kings of Chiang Mai, who tried to preserve the forests in the north. He ordered that after his death his remains should be placed at Doi Luang, which was then renamed. In 1954 the forests around Doi Inthanon were preserved as one of the original national parks of Thailand. The park spreads from the lowlands to the peak at 8,415 feet, thus covering many vegetation zones. A total of 362 species of birds, the second highest number of bird species of any national park in Thailand, have been recorded here. The park is often called The Roof of Thailand. For our first birding here, we stopped at a bridge at km13 to look for forktails, a very interesting black and white bird with a long, variegated tail that hangs out on the rocks in rushing streams. We found the **Black-backed Forktail** right off the bat. Next, we stopped at a nice overlook at km38 for 30 minutes or so to check out what was there. Some **Ashy Wood-Pigeons** flew over, a **Black-winged Cuckooshrike** popped up and said hello, **Flavescent Bulbuls** were everywhere and a **Striated Bulbul** sat up nicely. The best bird was the **Spectacled Barwing**, a brown bird with a nice, distinctive eye-ring and barring on its wing. The last group only heard this bird, and we had spectacular looks.

Next stop, the summit. At the highest point there is a nice shrine and a boardwalk around a little park with lovely moss-laden trees where we saw **Chestnut-crowned Laughingthrush**, **Chestnut-tailed Minla** and **Black-backed Sibia**. A little below the summit we took the Ang Ka Trail, a very nice boardwalk where we had some good birds, including: **Green-tailed Sunbird**, **Pygmy Wren-Babbler**, **White-browed Shortwing**, **Yellow-bellied Fantail**, **Rufous-winged Fulvetta**, **Chestnut**, **Gray-sided & Eyebrowed Thrushes**, **Vivid Niltava** and 3 *Phylloscopus* warblers (**Buff-barred**, **Ashy-throated** & **White-tailed Leaf-Warbler**). We watched as one of the warblers was building a nest right in front of us.

Chestnut-tailed Minla

White-browed Shortwing

Yellow-bellied Fantail

We moved on down to a trail at KM 37.5 (or the Jeep Trail), looking for the Green Cochoas. We went to about the 700-meter mark and had some good birds, including **Golden-throated Barbet**, **Long-tailed Broadbill**, **Large Niltava**, **Golden Babbler** and **Lesser Racket-tailed Drongo**, but sadly but not the cochoa. On the way out we heard a **Slaty-bellied Tesia** and we spent a good 20-30 minutes trying to see this little bird. It's a little, skulky guy and tough to see, but we finally prevailed. We met an amusingly-named Brit who stopped to share bird stories for a bit before moving on. By this time, we were all hungry and headed down to Mr. Deang's restaurant. Famous among birders in Asia. The big attraction is supposed to be the birds that gather around a water pipe that dumps out into a ravine below. It is supposed to be a real hot spot around that pipe, but nothing came in to visit while we were there. Some of the migrants may have already left. The food was absolutely delicious and different tasting than the other dishes we have had so far. This was about the only decent place to eat in the park, so many the birders come here. They have a logbook where everyone puts their observations; several of them were 2 or 3 pages long. An excellent resource.

After lunch we went down a little road nearby to a place known for **Slaty-backed Forktail** and had success here too. Two forktails down, one to go. We also saw a **Gray Wagtail** bopping along the riverside. We moved on to Siribhumi Waterfall, one of many in the park, which is surrounded by a pretty, nicely landscaped garden. This is the guide's secret spot for **White-capped** and **Plumbeous Redstarts**. Both beautiful birds in their own right, with the White-capped being the flashiest with its black and bright red body and white cap and the Plumbeous being more subtle, but cute with a blue-gray head and body and chestnut tail that flicks open and closed constantly. Next stop was a blind where a **Black-tailed Crake** comes out every evening at about 4pm to walk around in the grass beside a little pond. I thought we were going to miss it, as we sat for a while with not much to watch for but the Crake. The three of us did have a nice chat, though. Sure enough, on schedule it popped out for a brief view. Luckily we were paying attention.

On the way down we stopped at Vachirathan Waterfall, the largest in Doi Inthanon. There were lots of signs say no swimming or wading, but there were lots of people in every little swimming hole and relaxing on the rocks. So much for signs. They all seemed to be having a great time though, and no one seemed to mind. Of course, there were no birds to be seen by the river. Just distant **Scarlet Minivet & Black-throated Sunbirds** seen by the car park. Near the falls was a little shopping area with souvenir shops and a café. We took a quick look and met some more interesting people, but not for long as we had more birds to see. We headed back toward the resort and, just before we got to it, turned down a road that passed by houses and ended in a scrubby, secondary growth area, different from the broadleaf evergreen habitat of the mountain. This is a good spot for **Blossom-headed Parakeets** and other open area birds. We had good luck seeing 40-50 Parakeets perching at their pre-roost site and flying over headed toward their resting spot for the night. We also spotted some **Green Bee-eaters**, a **Purple Sunbird**, **Lineated Barbet** and **Black-collared Starlings** to add to our list. We finally called it a day and headed back for more Thai food. We did our checklist (another good one tonight!) and headed off to our comfy room.

Plumbeous Redstart

Black-tailed Crake

Purple Sunbird

29th March – Doi Inthanon.

The usual routine of an early breakfast and being picked up by our driver. We stopped at the overlook again and found **White-throated Fantail**, **Long-tailed Minivet** and **Mountain Tailorbird**. All very attractive little birds. We returned to the Jeep Trail and spent some time there before moving on to km34.5 where we hiked along that trail. We ran into another British birder and stopped to exchange gen. We didn't have big numbers of birds, but had some quality ones like **White-tailed Robin**, **Eye-browed Wren-Babbler**,

Chestnut-fronted Shrike-Babbler and **Lesser Shortwing**. All skulkers. These are really hard ones to get, and we were quite proud of ourselves. We also saw a beautiful **Maroon Oriole**, **Gray-cheeked Fulvettas**, lots of **Silver-eared Mesias** (stunning white, yellow, black and red birds), **Brown Treecreeper**, **Rufous-backed Sibia** and **Chestnut-vented Nuthatch**. We finally heard **Green Cochoa**, one of our major targets. The high pitched whistle was incredible difficult to pin point and we had no idea of which direction it was coming from. It too came in closer, but then further away and then stopped calling. It was finally time for lunch, and we returned to Mr. Deang's for another delicious lunch but still no birds at the water pipe. We headed back to the summit, but it started pouring down rain, so we drove back down where it wasn't raining. On the way back down spotting a **Gray-backed Shrike**. Our only one of the trip. We returned to the overlook where we saw **Yellow-cheeked Tit** and **Fire-breasted Flowerpecker**, both looking just as you might expect. We were trying to find Gould's Sunbird, but had no luck. These had been very easy on previous trips which suggests there is some change in the floration of their food plants.

About 4pm, we returned to the km34.5 trail and added a few more birds, including really attractive ones like **Short-billed Minivet**, **Chestnut-crowned Warbler**, **Little Pied Flycatcher**, **Verditer Flycatcher**, **Large Niltava** & **Gray-headed Canary-flycatcher**. The worst one was the **Russet Bush-Warbler** who stayed in the grasses almost at our feet and called incessantly, but would not show himself. We finally got decent views. **Rusty-naped Pitta** was heard close and came in even closer, but didn't show. The plan was to stick around until 7pm and do some owling and try to see a Hodgson's Frogmouth, but we waited until after dark and heard nothing but very loud cicadas, so we hiked back. The moon was full and so bright that we really didn't need flashlights. Back to the resort to eat. For the last 2 nights, we were the only ones there, but tonight there was a big group of Thais doing karaoke and having a grand time. The usual checklist and then to bed. Luckily the karaoke stopped at 10pm.

30th March – Doi Inthanon to Doi Chiang Dao.

This morning we set off again for km13 trail in Doi Inthanon National Park. This trail is a steep road that just keeps climbing through scrub vegetation. Every now and then it would flatten out, but then go back to being steep. We were expecting that the birding would be slow, and it was in the beginning. The first bird we saw was a **Eurasian Jay**, which seemed a bit out of place here since we have only seen them in Europe before. Two **Black Bazas** flew over and landed in a far tree for a good scope view. We came up this track for woodpeckers, Collared Falconet, and other raptors. We finally found our first woodpecker after about an hour, a cute little **Gray-capped Woodpecker**. Then, we got on a distant **Common Flameback**, a woodpecker we had already seen on this trip. A hawk flew over, and we decided after some debate that it was a **Northern Goshawk**.

We reached a point where we had to head back but after a short while we spotted a **Collared Falconet**. On a scale of 1 to 10, this guy has a cute factor of 20. Then we ran into a large flock of **Brown-rumped Minivets**, but we also spotted a **Rosy Minivet** in amongst them. Whilst looking at the minivets, we saw some swifts flying above which we identified as **Brown-backed Needletails** and the much smaller **Himalayan Swiftlet**. Other birds we saw were **Mountain Imperial-Pigeon**, **Golden-fronted Leafbird** and **Purple Sunbird**. A **Shikra** also buzzed us nicely, so we had some good raptors in the end too. I did see a nuthatch, but it was a **Velvet-fronted** one I had already seen. No more woodpeckers. We headed back to the resort with a quick stop at a paddyfield to check it out. There was good stuff there and we added **White-throated Kingfisher**, **Hoopoe**, **Striated Swallow**, **Rufous-winged Buzzard**, **Oriental Honey-Buzzard**, **Pied Bushchat**, **Zitting & Golden-headed Cisticolas**, **Siberian Stonechat** and a very pretty **Coppersmith Barbet** sitting out in the open for us all to admire. We stopped in for a half hour to pack up and check out.

We drove to Chiang Mai and went to lunch at a very nice Thai restaurant. We then drove to Doi Chiang Dao and stopped at the Chiang Dao Nest, our home for two nights. Our rooms are little bamboo cabins with woven bamboo walls and beautiful wood floors. After getting in we took a short break, and walked to the nearby Wat Tam Pha Plong temple to bird. The temple sits on a sanctified cave, commemorating a much-revered monk who set up a meditation retreat in there. You walk up 600 steps winding through limestone formations to get to the temple. The view from the top is stunning, in addition to being a great place for birding. Our targets here were **Black Bulbuls, Rufous-fronted Babbler, Streaked Wren-Babbler** (we are going for all 4 wren-babblers!) and Pin-tailed Pigeon. We found all of them but the pigeon. Other interesting birds were **Indian Cuckoo, House Swift, Puff-throated & Gray-eyed Bulbuls** and **Striated Yuhina**. We walked down to the so called the Gully Trail, not a particularly easy trail. We heard thunder and ignored it for a bit, but then the rain came, so we packed all our stuff in a wet bag, and we slogged our way back. We had to give up on owling tonight because of the rain. We dumped our stuff without much pause and went straight to dinner. Western food followed by checklist and off to bed.

Giant Nuthatch

Crested Treeswift nest

Grey-capped Woodpecker

31st March – Den Ya Kat substation & Doi Chiang Dao area.

This morning we had to get up even earlier, on the road at 5am with a boxed breakfast and lunch, so we could have a chance at seeing Hume's Pheasant. We made a brief stop along the way at the local 7 Eleven to get some coffee, and Tony drove us to the Den Ya Kat Substation in Chiang Dao Wildlife Reserve, one of the top bird-watching locations in Thailand with rare species such as Giant Nuthatch and Hume's Pheasant seen regularly. The variety of forest types and altitude of the mountain combined with its close proximity to Myanmar result in a large number of exciting birds found here, as well as some beautiful views and a relaxing atmosphere.

Yesterday Tony drove back to Chiang Mai (where he lives) and traded out the van for a 4-wheel drive SUV and got up even earlier than we did to pick us up, as it's about an hour from Chiang Mai to our hotel. The road was steep and pretty rutted, so the 20-km ride up the mountain was uncomfortable much of the time. We made a few stops along the way when we would hear something good. Our first bird was **Gray-headed Woodpecker**, a new one. Nice way to start the day. We drove slowly along the stretch of road where the pheasants were supposed to hang out, but had no luck. We stopped at a junction of the road and got out to explore along the firebreak, another popular spot for them. We dug into our breakfast of cereal and fruit and headed out to explore. We investigated some rustling and saw some nice White-crested Laughingthrushes which we had missed at previous sites. Also nice view of a Large Woodshrike. The star bird along here though was the **Giant Nuthatch**. Our other major target for the morning. We had gripping views of 2 birds very close and at eye level. We wandered some more, but had no luck with the pheasants and so went further up the road, stopping to bird along the way. We picked up a flyover **Mountain Hawk-Eagle** and a pair of **Crested Treeswifts**. While we were watching the female perched we realized that she was actually building a nest!

After a virtual drought of woodpeckers, we had a 4-woodpecker day: **Gray-capped Woodpecker, Stripe-breasted Woodpecker, Greater Yellownappe** and the aforementioned **Gray-headed Woodpecker**. What a treat! Other good birds seen on our way to the substation were **Black Bulbul** and **Fire-breasted Flowerpecker**. We reached the end of the road at the top, and there was a beautiful campground that no one ever uses because of the bad road. So there was just a couple of lonely rangers that live up there and us. We wandered around a bit and sat at the picnic table to eat our lunches. While we were sitting there, we spotted a **Burmese Shrike** that popped up in a nearby field. We also had **Ashy Drongo** here that looked

very different from the ones we had been seeing previously. We finished our lunches, and took a short walk on a trail leading off from the campground, but didn't find much.

We started back down the mountain, enjoying views of the massive peak of Doi Chiang Dao and stopping for flocks. On the way back down we had various stops picking up more and more species. Our driver was getting more and more into the birding and spotted a huge **Crested Serpent-Eagle** perched low down along the road. Mixed flocks along the road contained birds like **Striated & White-bellied Yuhinas** and **Short-billed & Gray-chinned Minivets**. On a previous trip we had seen good birds around the checkpoint and we walked around looking for some of the same birds. Of course we got none of the ones we were looking for but plenty that we hadn't expected. We both had great views of **Maroon Oriole & Speckled Piculet**. I also had brief glimpses of a stunning **Red-headed Trogon** but it seemed a bit shy of being seen by the client and always half a second ahead.

Many **Great Barbets** were calling all the way down but we finally heard one calling close and got out to scan the tree tops along the valley. We both got scope views of a stunning bird, very different from most of the other barbets. Further down, we pulled up slowly to a small stream where I had heard forketails before. Lo and behold there were 2 gorgeous **White-crowned Forktails** showing well for a few seconds. Our 3rd species of the trip. The forest came to an end and we took a quick scan around the paddyfields at the bottom and happened on a handsome **Rufous-winged Buzzard** that was eating some tasty morsel on a distant snag. It had already been a long day but I managed to twist the clients arm to do a bit more birding and we headed to a different Checkpoint Trail near the hotel where we added the handsome and vocal Hainan Blue-Flycatcher before returning back to the hotel to enjoy some more gourmet cuisine at Chiang Dao Nest. Early to bed as we have to get up early again for a pheasant hunt. Marcia casually mentioned at dinner that she only needed 18 more new species to reach 300 new birds for her whole trip starting in February. Checking the list to see how many we might have these last few days, we realized it would be close.

Doi Chiang Dao is Thailand's 3rd highest mountain

1st April – Doi Chiang Dao to Doi Ang Khang.

We needed to be at the first spot, km41 on the road to Doi Ang Khang, at 6:45am if we wanted a chance to see Hume's Pheasant. Doi Ang Khang, in Chiang Mai province, is an area on the border with Myanmar consisting of a number of peaks and ridges that, although largely deforested, contain a lot of scrubby vegetation and forest patches which provide enough habitat to house a good number of bird species, many of which are found in few other parts of the country. One of the joys of Doi Ang Khang is that the scenery is quite beautiful. A number of small hill tribe villages dot the region as well as a few Thai military outposts, which occasionally get involved in cross-border disagreements with nearby Burmese military installations, giving the region an atmosphere of adventure. Even though we told our driver several times, he didn't seem to get that we were trying to get to a specific spot by a certain time, and every time he saw any bird, he slowed down for us to see it. On top of that, when we got close, some farmers were driving a large herd of cows down the road. They moved them over to one lane, but Tony was reluctant to go around them. We eventually got to km39 at about 6:40am, and start watching along the roadside. We passed km40, and just a short way on, we all saw them at about the same time. A male and female **Hume's pheasant!** What a beautiful bird. The field guide shows it looking a bit like a Ring-necked Pheasant with a red face, green head and chestnut body. The male we saw looked more dark green, in fact almost black with bold white wing bars and a long barred tail. We were all very happy to have got the bird, even the driver was happy that he got us there on time. We also saw a **Long-tailed Shrike**, a nice bird, but kind of anticlimactic.

We ate our packed breakfasts, cereal and fruit, and moved on to the Mae Per Trail for a short time, picking up **Bay Woodpecker** straight away. Mixed species flocks were conspicuous and contained birds such as, **Silver-eared Mesia**, **Spectacled Barwing**, **Rufous-backed Sibia**, **Yellow-cheeked Tit & Lesser Racket-tailed Drongo**. This trail is has always been good for Gould's Sunbird but we only managed to find **Black-throated Sunbird**. **Japanese White-eye** was common but it took a while scanning the flocks to find **Chestnut-flanked White-eye**. We arrived at km 21 Trail. Only about 300-400 feet long, but very birdy and holding something new and exciting on every visit. On this visit, it will be remembered as the 'Cute Bird Trail' because just about every new bird we saw had a very high cute quotient. We had a very vocal and diminutive **Lesser Shortwing** and then teased out **Chestnut-headed Tesia**, a small yellow bird with a reddish-brown head and a white eyering; **White-browed Piculet**, a miniature orange-yellow woodpecker with a white eyebrow and a **Yellow-bellied Flowerpecker** that sat nicely allowing good views. We found a **Lemon-rumped Warbler** that we didn't really have to hem and haw over, as it is a fairly distinctive warbler for this family. And after a lot of tries and a great deal of frustration we had a decent look at the very skulky **Red-faced Liocichla**, The guide's favourite bird in Thailand. Other good birds included, **Eyebrowed & Blue Whistling-Thrushes**, **Buff-barred Warbler** and **Gray Treepie**.

Long-tailed Shrike

Lesser Shortwing

Blue Whistling-Thrush

About lunchtime, we loaded up and our driver took us to the Angkhang Nature Resort, the nicest place we have stayed yet. It was beautiful, the rooms and bathrooms are very spacious, the grounds are beautiful, and the restaurant serves just about anything you could want. The restaurant has a lovely terrace with a beautiful view of the mountains. The temperature was perfect, maybe 70 degrees and low humidity with a gentle breeze, and the day was just lovely. We had shrimp rolls with apricot sauce, spring rolls, chicken cashew, pork ribs, sea bass, veggies, and fried rice. A lot of food, all delicious. Unfortunately, Bob mistook one of the little green peppers for a green bean and popped it into his mouth. One chomp and it came right back out. It took him about 30 minutes to get to a point where he could talk again. I was really worried that he might not make it, as he was having a hard time breathing the first few minutes. We felt very bad for him.

After a short rest, we drove to the Kings Agricultural Research Project, a beautiful botanical garden with formal gardens as well as some untended areas. Our target here was the **Limestone Wren-Babbler**, the last of the 4 wren-babblers we had a chance for, and usually the easiest one to find. Up and down steps, meandering through limestone formations in the wilder part of the gardens looking for another little brown job. We stopped at the top as some good birds had been seen here last time, and sure enough 3 **Common Rosefinches** popped up. Then an accipiter-like bird whooshed through, and we managed to get a brief look at it. After much deliberation, we decided on **Large Hawk-Cuckoo**, because of the graduated tail and its shape. Other interesting species seen were **Fork-tailed Swifts** flying over head, **Arctic Warbler**, **Hill Blue & Verditer Flycatchers**.

We picked our way back down the hillside, Bob going a different way because of the steepness of the steps. We finally heard the wren-babbler, and we had our 4th species of the trip although he was a bit larger than the other 3. We walked through the Scented Garden, taking in all the lovely smells of lavender, curry and other romatic plants, to get to the back of the kitchen where there was another water pipe that sometimes has interesting thrushes. Not today. We made one last stop walking along a road that passed through one of the villages and then turned into a track leading to their fields and a scrubby area to look for **White-browed Laughingthrush**, **Brown-breasted Bulbuls** and **Gray-breasted Prinia**. We found the prinias & laughingthrushes fairly quickly, but had a hard time with the bulbuls, who are usually so visible that you sometimes wish they would all go home so you could concentrate on the other birds. As light was starting to fade and the farmers were returning from working their fields, we finally managed to see a couple. Back to the resort for a sumptuous dinner of sea bass and other goodies before trudging up the hill to bed.

Limestone Wren-Babbler

Hill Blue Flycatcher

The King's Project Gardens

2nd April – Doi Ang Khang to Chiang Saen. Flight Chiang Rai to Bangkok.

On our last birding day, we were off to Chiang Saen to take a look at the Mekong River and the Chiang Saen Lake. This is a departure from our original schedule, and the reason for so many consecutive early mornings. We were just supposed to leave Doi Chang Dao in a leisurely fashion and bird Doi Ang Khang the afternoon of April 1 and the morning of April 2, but considering what the last group had at Chiang Saen, it would be worthwhile. If we left early, we could hit the river and lake on the way to Chiang Rai Airport . So, first stop was an overlook of the Mekong River in the town of Chiang Saen. We only needed 3 more birds to hit 300 trip lifers. Could we do it? The first bird I found in my scope was a **Common Sandpiper**, not exciting, but nice to see. The second was a **Small Pratincole!** One down, 2 to go. We scanned up and down the river sandbars and added **Spot-billed Duck**, **Little Egret**, **Common Greenshank** and **Gray Heron**. A little bird popped out of the grasses. A **Yellow-bellied Prinia**. 2 down, 1 to go.

The other side of the river was Laos, so we looked for birds to build up our Laos lists. I found **Small Pratincole**, **Great Egret**, **Little Egret**, **Common Sandpiper** and **Common Greenshank**. Then another shorebird that turned out to be **Green Sandpiper**. Yay! 300 new birds for her trip and a 'bingo' bird. That's when you have all the birds on a page in your field guide but one, and when you get that last one you say 'Bingo!'. Now we just needed some insurance birds in case of a miscout. We moved on through the town to a nice looking restaurant that has a good view of the river sandbars. The target bird here for most groups is the River Lapwing. We moved closer to the river and found a **White Wagtail** and some **Oriental Turtle-Doves**. Scanning upriver, there was a nice little wash with some good birds in it like **Little Ringed Plover**. More scanning and we finally found the **River Lapwing**. Distant, but discernable. A really great bird to get.

We had a quick tourist stop at a 500-year old temple to take some photos. Unfortunately, today was a big festival day with lots of people, so we really couldn't get in to walk around. We moved on to the lake, a Ramsar site, and a good spot for rarities to show up. It was a lovely lake with lots of water lilies and marsh grasses lining the shore. We walked along a boardwalk with widely spaced boards and pieces of bamboo. Not bad to walk on, but pretty hard to find a place to set up your scope. The first birds we saw were the trusty **White-breasted Waterhen** and about a thousand **Lesser Whistling Ducks**. A **Yellow Bittern** flew by, but unfortunately Marcia missed it. **Common Moorhen** and **Purple Swamphen** pecked through the lilies, and an **Intermediate Egret** stalked the shoreline. **Black-winged Stilts** and **Little Grebes** were everywhere, and a total of 6 **White-browed Crakes**. It was nice to see a crane be so visible. We finally found a **Pheasant-tailed Jacana** (another insurance bird) tripping through the lilies. Lots of **Spot-billed Ducks**, but not 1 **Garganey!** There had been hundreds last week, and every one of them was gone. Still a nemesis bird for Marcia. A little **Dusky Warbler** that flitted into view was a poor consolation. We stopped at a couple of other places along the lake to look for anything new. **Gray-headed Lapwing** and **Chestnut-tailed Starling** were seen here last time, but not today. That was that. Off to the Chiang Rai Airport to fly back to Bangkok.

We had to juggle carry-on bags, as they were weighing them, but we managed to get everything through. The plane was supposed to leave at 1:30pm, but a previous flight was delayed, so we didn't get off until about 3pm. Uneventful flight, but the traffic on Friday afternoon in Bangkok was a nightmare and we didn't get to the hotel until after 7pm. The evening was spent on subspecies identification before hitting the hay before another early morning.

Large numbers of Lesser Whistling-Ducks at Chiang Saen Lake

3rd April – Fly to US

We arranged to have a packed breakfast as we were leaving so early, and the 3 of us piled into our scheduled van to go to the airport. A group called the Red Shirts had been protesting but the government was doing a good job in minimizing any disruptions and we had no problems getting there. After making sure our flight was on time, we said our final farewells. It had been a fast pace tour in which we had covered a lot of ground and seen an impressive 350sp (plus 22 s[pecies heard] in 12 days.

Trip list

Taxonomy following Clements 6th edition

Little Grebe	<i>Tachybaptus ruficollis</i>	Seen at Chiang Saen.
Indian Cormorant	<i>Phalacrocorax fuscicollis</i>	Seen at Pak Thale.
Little Cormorant	<i>Phalacrocorax niger</i>	Seen at Pak Thale .
Gray Heron	<i>Ardea cinerea</i>	Seen at Pak Thale & Chiang Saen.
Great Egret	<i>Ardea alba</i>	Seen at Pak Thale & Chiang Saen.
Intermediate Egret	<i>Egretta intermedia</i>	Seen at Chiang Saen.
Little Egret	<i>Egretta garzetta</i>	Seen at Pak Thale, Krabi & Chiang Saen.
Chinese Pond-Heron	<i>Ardeola bacchus</i>	Commonly seen at most sites.
Javan Pond-Heron	<i>Ardeola speciosa</i>	Seen at Pak Thale by the guide.
Cattle Egret	<i>Bubulcus ibis</i>	Commonly seen throughout.
Striated Heron	<i>Butorides striata</i>	Seen at Kaeng Krachan & Krabi.
Yellow Bittern	<i>Ixobrychus sinensis</i>	Seen at Pak Thale, Kaeng Krachan & Chiang Saen.
Asian Openbill	<i>Anastomus oscitans</i>	Seen at Pak Thale & Khao Nor Chuchi.
Lesser Whistling-Duck	<i>Dendrocygna javanica</i>	Seen at Chiang Saen.
Spot-billed Duck	<i>Anas poecilorhyncha</i>	Seen at Chiang Saen.
Black Baza	<i>Aviceda leuphotes</i>	Seen at Kaeng Krachan, Khao Nor Chuchi & Doi Inthanon.
Oriental Honey-buzzard	<i>Pernis ptilorhynchus</i>	Seen at Doi Inthanon.
Black-shouldered Kite	<i>Elanus caeruleus</i>	Seen at Pak Thale .
Brahminy Kite	<i>Haliastur indus</i>	Seen at Pak Thale & Krabi.
Crested Serpent-Eagle	<i>Spilornis cheela</i>	Seen at Kaeng Krachan, Khao Nor Chuchi & Doi Chiang Dao.
Crested Goshawk	<i>Accipiter trivirgatus</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Shikra	<i>Accipiter badius</i>	Seen at Doi Inthanon.
Chinese Goshawk	<i>Accipiter soloensis</i>	Seen at Kaeng Krachan.
Besra	<i>Accipiter virgatus</i>	Seen at Kaeng Krachan.
Northern Goshawk	<i>Accipiter gentilis</i>	Seen at Doi Inthanon.
Rufous-winged Buzzard	<i>Butastur liverter</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Gray-faced Buzzard	<i>Butastur indicus</i>	Seen at Kaeng Krachan.
Eurasian Buzzard	<i>Buteo buteo</i>	Seen at Doi Inthanon.
Booted Eagle	<i>Aquila pennatus</i>	Seen at Kaeng Krachan.
Changeable Hawk-Eagle	<i>Spizaetus cirrhatus</i>	Seen at Kaeng Krachan.
Mountain Hawk-Eagle	<i>Spizaetus nipalensis</i>	Seen at Doi Chiang Dao.
Wallace's Hawk-Eagle	<i>Spizaetus nanus</i>	Seen at Khao Nor Chuchi.
Collared Falconet	<i>Microhierax caerulescens</i>	Seen at Doi Inthanon.
Rufous-throated Partridge	<i>Arborophila rufogularis</i>	Heard at Doi Inthanon & Doi Ang Khang.
Scaly-breasted Partridge	<i>Arborophila chloropus</i>	Heard at Kaeng Krachan & Doi Chiang Dao.
Red Junglefowl	<i>Gallus gallus</i>	Seen at Kaeng Krachan.
Hume's Pheasant	<i>Symycterus humiae</i>	Seen at Doi Ang Khang.
White-breasted Waterhen	<i>Amauornis phoenicurus</i>	Seen at Chiang Saen.
Black-tailed Crake	<i>Amauornis bicolor</i>	Seen at Doi Inthanon.
White-browed Crake	<i>Porzana cinerea</i>	Seen at Chiang Saen.
Purple Swampphen	<i>Porphyrio porphyrio</i>	Seen at Chiang Saen.
Common Moorhen	<i>Gallinula chloropus</i>	Seen at Chiang Saen.
Pheasant-tailed Jacana	<i>Hydrophasianus chirurgus</i>	Seen at Chiang Saen.
Black-winged Stilt	<i>Himantopus himantopus</i>	Seen at Pak Thale, Khao Nor Chuchi & Chiang Saen.
Oriental Pratincole	<i>Glareola maldivarum</i>	Seen at Pak Thale .
Small Pratincole	<i>Glareola lactea</i>	Seen at Chiang Saen.
River Lapwing	<i>Vanellus duvaucelii</i>	Seen at Chiang Saen.
Red-wattled Lapwing	<i>Vanellus indicus</i>	Seen at Pak Thale , Kaeng Krachan & Doi Inthanon.
Black-bellied Plover	<i>Pluvialis squatarola</i>	Seen at Pak Thale .
Little Ringed Plover	<i>Charadrius dubius</i>	Seen at Chiang Saen.
Snowy Plover	<i>Charadrius alexandrinus</i>	Seen at Pak Thale .
Lesser Sandplover	<i>Charadrius mongolus</i>	Seen at Pak Thale .
Greater Sandplover	<i>Charadrius leschenaultii</i>	Seen at Pak Thale .
Common Snipe	<i>Gallinago gallinago</i>	Seen at Doi Inthanon.
Black-tailed Godwit	<i>Limosa limosa</i>	Seen at Pak Thale .
Eurasian Curlew	<i>Numenius arquata</i>	Seen at Pak Thale .
Far Eastern Curlew	<i>Numenius madagascariensis</i>	Seen at Pak Thale .
Spotted Redshank	<i>Tringa erythropus</i>	Seen at Pak Thale .
Marsh Sandpiper	<i>Tringa stagnatilis</i>	Seen at Pak Thale .
Common Greenshank	<i>Tringa nebularia</i>	Seen at Pak Thale & Chiang Saen.
Green Sandpiper	<i>Tringa ochropus</i>	Seen at Chiang Saen.
Common Sandpiper	<i>Actitis hypoleucos</i>	Seen at Khao Nor Chuchi, Krabi & Chiang Saen.
Red Knot	<i>Calidris canutus</i>	Seen at Pak Thale .
Red-necked Stint	<i>Calidris ruficollis</i>	Seen at Pak Thale .
Temminck's Stint	<i>Calidris temminckii</i>	Seen at Pak Thale .
Curlew Sandpiper	<i>Calidris ferruginea</i>	Seen at Pak Thale .
Spoon-billed Sandpiper	<i>Eurynorhynchus pygmeus</i>	Seen at Pak Thale .
Ruff	<i>Philomachus pugnax</i>	Seen at Pak Thale .
Brown-headed Gull	<i>Larus brunnicephalus</i>	Seen at Pak Thale .
Little Tern	<i>Sterna albifrons</i>	Seen at Pak Thale .
Whiskered Tern	<i>Chlidonias hybridus</i>	Seen at Pak Thale & Khao Nor Chuchi.
Rock Pigeon	<i>Columba livia</i>	Seen at all sites in the South.
Ashy Wood-Pigeon	<i>Columba pulchricollis</i>	Seen at Doi Inthanon.
Oriental Turtle-Dove	<i>Streptopelia orientalis</i>	Seen at Chiang Saen.
Red Collared-Dove	<i>Streptopelia tranquebarica</i>	Seen at Pak Thale & Khao Nor Chuchi.
Spotted Dove	<i>Streptopelia chinensis</i>	Seen at most sites.
Little Cuckoo-Dove	<i>Macropygia ruficeps</i>	Seen at Kaeng Krachan.
Emerald Dove	<i>Chalcophaps indica</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.

Zebra Dove	<i>Geopelia striata</i>	Seen at Pak Thale & Doi Inthanon.
Thick-billed Pigeon	<i>Treron curvirostra</i>	Seen at Khao Nor Chuchi.
Jambu Fruit-Dove	<i>Ptilinopus jambu</i>	Heard at Khao Nor Chuchi.
Mountain Imperial-Pigeon	<i>Ducula badia</i>	Seen at Doi Inthanon & heard at Doi Ang Khang.
Blossom-headed Parakeet	<i>Psittacula roseata</i>	Seen at Doi Inthanon.
Vernal Hanging-Parrot	<i>Loriculus vernalis</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Chestnut-winged Cuckoo	<i>Clamator coromandus</i>	Seen at Kaeng Krachan.
Large Hawk-Cuckoo	<i>Cuculus sparveroides</i>	Seen at Kaeng Krachan & Doi Ang Khang. Heard at Doi Inthanon & Doi Chiang Dao.
Indian Cuckoo	<i>Cuculus micropterus</i>	Seen or heard at most sites.
Oriental Cuckoo	<i>Cuculus saturatus</i>	Heard at Doi Inthanon.
Banded Bay Cuckoo	<i>Cacomantis sonneratii</i>	Seen at Kaeng Krachan. Heard at Khao Nor Chuchi, Doi Inthanon & Doi Chiang Dao.
Plaintive Cuckoo	<i>Cacomantis merulinus</i>	Heard at Doi Ang Khang & Chiang Saen.
Asian Koel	<i>Eudynamis scolopacea</i>	Seen at Kaeng Krachan & Chiang Saen. Heard at Doi Inthanon.
Green-billed Malkoha	<i>Phaenicophaeus tristis</i>	Seen at Kaeng Krachan.
Greater Coucal	<i>Centropus sinensis</i>	Seen at most sites.
Lesser Coucal	<i>Centropus bengalensis</i>	Seen at Kaeng Krachan.
Collared Scops-Owl	<i>Otus lettia</i>	Heard at Kaeng Krachan & Doi Chiang Dao.
Brown Wood-Owl	<i>Strix leptogrammica</i>	Heard at Khao Nor Chuchi.
Collared Owlet	<i>Glaucidium brodiei</i>	Heard at Kaeng Krachan.
Asian Barred Owlet	<i>Glaucidium cuculoides</i>	Seen at Kaeng Krachan. Heard at Doi Inthanon & Doi Chiang Dao.
Javan Frogmouth	<i>Batrachostomus javensis</i>	Heard at Khao Nor Chuchi.
Large-tailed Nightjar	<i>Caprimulgus macrurus</i>	Seen at Kaeng Krachan & Heard at Doi Chiang Dao.
Himalayan Swiftlet	<i>Aerodramus brevirostris</i>	Seen at Doi Chiang Dao.
German's Swiftlet	<i>Aerodramus germani</i>	Seen at Khao Nor Chuchi & Krabi.
Brown-backed Needletail	<i>Hirundapus giganteus</i>	Seen at Doi Inthanon.
Asian Palm-Swift	<i>Cypsiurus balasienensis</i>	Seen at Kaeng Krachan, Khao Nor Chuchi, Krabi & Doi Inthanon.
Fork-tailed Swift	<i>Apus pacificus</i>	Seen at Kaeng Krachan & Doi Ang Khang.
House Swift	<i>Apus nipalensis</i>	Seen at Khao Nor Chuchi, Doi Chiang Dao & Chiang Saen.
Crested Treeswift	<i>Hemiprocne coronata</i>	Seen at Doi Chiang Dao.
Gray-rumped Treeswift	<i>Hemiprocne longipennis</i>	Seen at Kaeng Krachan.
Diard's Trogon	<i>Harpactes diardii</i>	Seen at Khao Nor Chuchi.
Scarlet-rumped Trogon	<i>Harpactes duvaucelii</i>	Heard at Khao Nor Chuchi.
Red-headed Trogon	<i>Harpactes erythrocephalus</i>	Seen at Doi Chiang Dao.
Orange-breasted Trogon	<i>Harpactes oreskios</i>	Heard at Khao Nor Chuchi.
Blue-eared Kingfisher	<i>Alcedo meninting</i>	Seen at Kaeng Krachan.
Black-backed Kingfisher	<i>Ceyx erithacus</i>	Seen at Khao Nor Chuchi.
Rufous-backed Kingfisher	<i>Ceyx rufidorsa</i>	Seen at Khao Nor Chuchi.
Brown-winged Kingfisher	<i>Pelargopsis amauropterus</i>	Seen at Krabi.
White-throated Kingfisher	<i>Halcyon smyrnensis</i>	Seen at Pak Thale , Kaeng Krachan, Khao Nor Chuchi & Doi Inthanon.
Black-capped Kingfisher	<i>Halcyon pileata</i>	Seen at Pak Thale & Kaeng Krachan.
Red-bearded Bee-eater	<i>Nyctornis amictus</i>	Seen at Kaeng Krachan.
Green Bee-eater	<i>Merops orientalis</i>	Seen at Doi Inthanon.
Blue-throated Bee-eater	<i>Merops viridis</i>	Seen at Kaeng Krachan.
Chestnut-headed Bee-eater	<i>Merops leschenaulti</i>	Seen at Kaeng Krachan.
Indian Roller	<i>Coracias benghalensis</i>	Seen at Kaeng Krachan.
Dollarbird	<i>Eurystomus orientalis</i>	Seen at Kaeng Krachan.
Hoopoe	<i>Upupa epops</i>	Seen at Pak Thale & Doi Inthanon.
Oriental Pied-Hornbill	<i>Anthracosceros albirostris</i>	Seen at Kaeng Krachan.
Great Hornbill	<i>Buceros bicornis</i>	Seen at Kaeng Krachan.
Rusty-cheeked Hornbill	<i>Anorrhinus tickelli</i>	Seen at Kaeng Krachan.
Wreathed Hornbill	<i>Aceros undulatus</i>	Seen at Kaeng Krachan.
Great Barbet	<i>Megalaima virens</i>	Seen at Kaeng Krachan & Doi Chiang Dao.
Lineated Barbet	<i>Megalaima lineata</i>	Seen at Doi Inthanon & Heard at Krabi.
Green-eared Barbet	<i>Megalaima faiostricta</i>	Seen at Kaeng Krachan.
Gold-whiskered Barbet	<i>Megalaima chrysopogon</i>	Heard at Khao Nor Chuchi.
Red-crowned Barbet	<i>Megalaima rafflesii</i>	Heard at Khao Nor Chuchi.
Red-throated Barbet	<i>Megalaima mystacophanos</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Golden-throated Barbet	<i>Megalaima franklinii</i>	Seen at Doi Inthanon & Heard at Doi Ang Khang.
Blue-throated Barbet	<i>Megalaima asiatica</i>	Seen at Kaeng Krachan. Heard at Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Blue-eared Barbet	<i>Megalaima australis</i>	Seen at Kaeng Krachan. Heard at Khao Nor Chuchi & Doi Inthanon.
Coppersmith Barbet	<i>Megalaima haemacephala</i>	Seen at Doi Inthanon & heard at Doi Chiang Dao.
Speckled Piculet	<i>Picumnus innominatus</i>	Seen at Doi Chiang Dao.
White-browed Piculet	<i>Sasia ochracea</i>	Seen at Doi Ang Khang.
Gray-capped Woodpecker	<i>Dendrocopos canicapillus</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Stripe-breasted Woodpecker	<i>Dendrocopos atratus</i>	Seen at Doi Chiang Dao.
Lesser Yellownape	<i>Picus chlorolophus</i>	Seen at Kaeng Krachan.
Crimson-winged Woodpecker	<i>Picus puniceus</i>	Heard at Kaeng Krachan.
Greater Yellownape	<i>Picus flavinucha</i>	Seen at Doi Chiang Dao.
Gray-faced Woodpecker	<i>Picus canus</i>	Seen at Doi Chiang Dao.
Common Flameback	<i>Kaeng Krachan</i>	Seen at Krabi & Doi Inthanon.
Greater Flameback	<i>Chrysocolaptes lucidus</i>	Heard at Kaeng Krachan.
Bay Woodpecker	<i>Blythipicus pyrrhotis</i>	Seen at Doi Ang Khang & heard at Doi Inthanon.
Buff-rumped Woodpecker	<i>Meiglyptes tristis</i>	Seen at Khao Nor Chuchi.
Black-and-yellow Broadbill	<i>Eurylaimus ochromalus</i>	Seen at Kaeng Krachan & heard at Khao Nor Chuchi.
Long-tailed Broadbill	<i>Psarisomus dalhousiae</i>	Seen at Kaeng Krachan & Doi Inthanon.
Green Broadbill	<i>Calyptomena viridis</i>	Seen at Khao Nor Chuchi.
Rusty-naped Pitta	<i>Pitta oatesi</i>	Heard at Doi Inthanon.
Blue Pitta	<i>Pitta cyanea</i>	Heard at Kaeng Krachan.
Banded Pitta	<i>Pitta guajana</i>	Seen at Khao Nor Chuchi.
Gurney's Pitta	<i>Pitta gurneyi</i>	Heard at Khao Nor Chuchi.
Mangrove Pitta	<i>Pitta megarhyncha</i>	Seen at Krabi.
Indochinese Bushlark	<i>Mirafr erythrocephala</i>	Seen at Pak Thale.

Barn Swallow	<i>Hirundo rustica</i>	Seen at all sites.
Red-rumped Swallow	<i>Cecropis daurica</i>	Seen at Doi Ang Khang.
Striated Swallow	<i>Cecropis striolata</i>	Seen at most sites.
Asian Martin	<i>Delichon dasypus</i>	Seen at Doi Inthanon.
Forest Wagtail	<i>Dendronanthus indicus</i>	Seen at Kaeng Krachan.
Gray Wagtail	<i>Motacilla cinerea</i>	Seen at Kaeng Krachan & Doi Inthanon.
Olive-backed Pipit	<i>Anthus hodgsoni</i>	Seen at Doi Chiang Dao.
Black-winged Cuckoo-shrike	<i>Coracina melaschistos</i>	Seen at Doi Inthanon.
Rosy Minivet	<i>Pericrocotus roseus</i>	Seen at Doi Inthanon.
Brown-rumped Minivet	<i>Pericrocotus cantonensis</i>	Seen at Khao Nor Chuchi & Doi Inthanon.
Long-tailed Minivet	<i>Pericrocotus ethologus</i>	Seen at Doi Inthanon.
Short-billed Minivet	<i>Pericrocotus brevirostris</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Scarlet Minivet	<i>Pericrocotus flammeus</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Gray-chinned Minivet	<i>Pericrocotus solaris</i>	Seen at Doi Chiang Dao.
Bar-winged Flycatcher-shrike	<i>Hemipus picatus</i>	Seen at Kaeng Krachan, Khao Nor Chuchi & Doi Chiang Dao.
Striated Bulbul	<i>Pycnonotus striatus</i>	Seen at Doi Inthanon.
Black-headed Bulbul	<i>Pycnonotus atriceps</i>	Seen at Khao Nor Chuchi & Doi Chiang Dao.
Black-crested Bulbul	<i>Pycnonotus melanicterus</i>	Seen at Kaeng Krachan, Doi Inthanon & Doi Chiang Dao.
Red-whiskered Bulbul	<i>Pycnonotus jocosus</i>	Seen at Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Brown-breasted Bulbul	<i>Pycnonotus xanthorrhous</i>	Seen at Doi Ang Khang.
Sooty-headed Bulbul	<i>Pycnonotus aurigaster</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Stripe-throated Bulbul	<i>Pycnonotus finlaysoni</i>	Seen at Kaeng Krachan.
Flavescent Bulbul	<i>Pycnonotus flavescens</i>	Seen at Kaeng Krachan, Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Streak-eared Bulbul	<i>Pycnonotus blanfordi</i>	Seen at Khao Nor Chuchi, Doi Inthanon & Doi Ang Khang.
Cream-vented Bulbul	<i>Pycnonotus simplex</i>	Seen at Khao Nor Chuchi.
Red-eyed Bulbul	<i>Pycnonotus brunneus</i>	Seen at Khao Nor Chuchi.
Puff-throated Bulbul	<i>Alophoixus pallidus</i>	Seen at Doi Chiang Dao.
Ochraceous Bulbul	<i>Alophoixus ochraceus</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Yellow-bellied Bulbul	<i>Alophoixus phaeocephalus</i>	Seen at Khao Nor Chuchi.
Hairy-backed Bulbul	<i>Tricholestes criniger</i>	Seen at Khao Nor Chuchi.
Gray-eyed Bulbul	<i>Iole propinqua</i>	Seen at Kaeng Krachan & Doi Chiang Dao.
Ashy Bulbul	<i>Hemixos flavala</i>	Seen at Kaeng Krachan.
Mountain Bulbul	<i>Ixos mccllellandii</i>	Seen at Kaeng Krachan, Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Black Bulbul	<i>Hypsipetes leucocephalus</i>	Seen at Doi Chiang Dao.
Greater Green Leafbird	<i>Chloropsis sonnerati</i>	Seen at Khao Nor Chuchi.
Lesser Green Leafbird	<i>Chloropsis cyanopogon</i>	Seen at Khao Nor Chuchi.
Blue-winged Leafbird	<i>Chloropsis cochinchinensis</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Golden-fronted Leafbird	<i>Chloropsis aurifrons</i>	Seen at Doi Inthanon.
Common Iora	<i>Aegithina tiphia</i>	Seen at Krabi & Chiang Saen.
Great Iora	<i>Aegithina lafresnayei</i>	Seen at Kaeng Krachan.
Blue Rock-Thrush	<i>Monticola solitarius</i>	Seen at Kaeng Krachan.
Blue Whistling-Thrush	<i>Myophonus caeruleus</i>	Seen at Doi Inthanon & Doi Ang Khang.
Orange-headed Thrush	<i>Zoothera citrina</i>	Seen at Kaeng Krachan.
Siberian Thrush	<i>Zoothera sibirica</i>	Seen at Kaeng Krachan.
Chestnut Thrush	<i>Turdus rubrocanus</i>	Seen at Doi Inthanon.
Gray-sided Thrush	<i>Turdus feae</i>	Seen at Doi Inthanon.
Eyebrowed Thrush	<i>Turdus obscurus</i>	Seen at Doi Inthanon & Doi Ang Khang.
Lesser Shortwing	<i>Brachypteryx leucophrys</i>	Seen at Doi Inthanon & Doi Ang Khang.
White-browed Shortwing	<i>Brachypteryx montana</i>	Seen at Doi Inthanon.
Zitting Cisticola	<i>Cisticola juncidis</i>	Seen at Doi Inthanon.
Golden-headed Cisticola	<i>Cisticola exilis</i>	Seen at Doi Inthanon.
Hill Prinia	<i>Prinia atrogularis</i>	Seen at Doi Inthanon & heard at Doi Ang Khang.
Gray-breasted Prinia	<i>Prinia hodgsonii</i>	Seen at Doi Ang Khang.
Yellow-bellied Prinia	<i>Prinia flaviventris</i>	Seen at Chiang Saen.
Plain Prinia	<i>Prinia inornata</i>	Seen at Chiang Saen.
Chestnut-headed Tesia	<i>Tesia castaneocoronata</i>	Seen at Doi Ang Khang.
Slaty-bellied Tesia	<i>Tesia olivea</i>	Seen at Doi Inthanon.
Asian Stubtail	<i>Urosphena squameiceps</i>	Seen at Doi Inthanon.
Russet Bush-Warbler	<i>Bradypterus seebohmi</i>	Seen at Doi Inthanon & heard at Doi Ang Khang.
Mountain Tailorbird	<i>Orthotomus cuculatus</i>	Seen at Doi Inthanon & Doi Ang Khang.
Common Tailorbird	<i>Orthotomus sutorius</i>	Seen at Kaeng Krachan, Khao Nor Chuchi, Krabi & Doi Inthanon.
Dark-necked Tailorbird	<i>Orthotomus atrogularis</i>	Seen at Kaeng Krachan, Khao Nor Chuchi & Krabi.
Dusky Warbler	<i>Phylloscopus fuscatus</i>	Seen at Chiang Saen.
Yellow-streaked Warbler	<i>Phylloscopus armandii</i>	Seen at Doi Chiang Dao.
Radde's Warbler	<i>Phylloscopus schwarzi</i>	Seen at Kaeng Krachan, Doi Ang Khang & Chiang Saen.
Buff-barred Warbler	<i>Phylloscopus pulcher</i>	Seen at Doi Inthanon & Doi Ang Khang.
Ashy-throated Warbler	<i>Phylloscopus maculipennis</i>	Seen at Doi Inthanon.
Lemon-rumped Warbler	<i>Phylloscopus proregulus</i>	Seen at Doi Ang Khang.
Pale-rumped Warbler	<i>Phylloscopus chloronotus</i>	Seen at Doi Inthanon.
Yellow-browed Warbler	<i>Phylloscopus inornatus</i>	Seen at Doi Chiang Dao.
Hume's Warbler	<i>Phylloscopus humei</i>	Seen at Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Arctic Warbler	<i>Phylloscopus borealis</i>	Seen at Doi Ang Khang.
Greenish Warbler	<i>Phylloscopus trochiloides</i>	Seen at Doi Inthanon.
Pale-legged Leaf-Warbler	<i>Phylloscopus tenellipes</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
White-tailed Leaf-Warbler	<i>Phylloscopus davisoni</i>	Seen at Doi Inthanon & Doi Ang Khang.
Chestnut-crowned Warbler	<i>Seicercus castaneiceps</i>	Seen at Doi Inthanon.
Yellow-bellied Warbler	<i>Abroscopus superciliosus</i>	Seen at Kaeng Krachan.
Fulvous-chested Jungle-Flycatcher	<i>Rhinomyias olivacea</i>	Seen at Khao Nor Chuchi.
Siberian Flycatcher	<i>Muscicapa sibirica</i>	Seen at Kaeng Krachan.
Asian Brown Flycatcher	<i>Muscicapa dauurica</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Brown-streaked Flycatcher	<i>Muscicapa williamsoni</i>	Seen by guide at Khao Nor Chuchi.
Korean Flycatcher	<i>Ficedula zanthopygia</i>	Seen at Kaeng Krachan.

Red-breasted Flycatcher	<i>Ficedula parva</i>	Seen at Kaeng Krachan, Doi Chiang Dao, Doi Ang Khang & Chiang Saen.
White-gorgeted Flycatcher	<i>Ficedula monileger</i>	Heard at Doi Inthanon.
Little Pied Flycatcher	<i>Ficedula westermanni</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Ultramarine Flycatcher	<i>Ficedula superciliiaris</i>	Seen at Kaeng Krachan.
Verditer Flycatcher	<i>Eumyias thalassina</i>	Seen at Doi Inthanon & Doi Ang Khang.
Large Niltava	<i>Niltava grandis</i>	Seen at Doi Inthanon.
Vivid Niltava	<i>Niltava vivida</i>	Seen at Doi Inthanon.
Hainan Blue-Flycatcher	<i>Cyornis hainanus</i>	Seen at Doi Chiang Dao.
Pale Blue-Flycatcher	<i>Cyornis unicolor</i>	Seen at Doi Chiang Dao.
Hill Blue-Flycatcher	<i>Cyornis banyumas</i>	Seen at Doi Chiang Dao & Doi Ang Khang.
Tickell's Blue-Flycatcher	<i>Cyornis tickelliae</i>	Seen at Khao Nor Chuchi.
Gray-headed Canary-flycatcher	<i>Culicicapa ceylonensis</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Siberian Blue Robin	<i>Luscinia cyane</i>	Seen at Khao Nor Chuchi.
Oriental Magpie-Robin	<i>Copsychus saularis</i>	Seen at most sites.
White-rumped Shama	<i>Copsychus malabaricus</i>	Seen at Kaeng Krachan & Doi Chiang Dao.
White-capped Redstart	<i>Chaimarrornis leucocephalus</i>	Seen at Doi Inthanon.
Plumbeous Redstart	<i>Rhyacornis fuliginosus</i>	Seen at Doi Inthanon.
White-tailed Robin	<i>Cinclidium leucurum</i>	Seen at Doi Inthanon.
Siberian Stonechat	<i>Saxicola maura</i>	Seen at Doi Chiang Dao.
Black-backed Forktail	<i>Enicurus immaculatus</i>	Seen at Doi Inthanon.
Slaty-backed Forktail	<i>Enicurus schistaceus</i>	Seen at Doi Inthanon.
White-crowned Forktail	<i>Enicurus leschenaulti</i>	Seen at Doi Chiang Dao & Doi Ang Khang.
Green Cochoa	<i>Cochoa viridis</i>	Heard at Doi Inthanon.
Pied Bushchat	<i>Saxicola caprata</i>	Seen at Doi Chiang Dao.
Yellow-bellied Fantail	<i>Rhipidura hypoxantha</i>	Seen at Doi Inthanon.
White-throated Fantail	<i>Rhipidura albicollis</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Black-naped Monarch	<i>Hypothymis azurea</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Asian Paradise-Flycatcher	<i>Terpsiphone paradisi</i>	Seen at Khao Nor Chuchi & Doi Chiang Dao.
Mangrove Whistler	<i>Pachycephala grisola</i>	Heard at Krabi.
White-crested Laughingthrush	<i>Garrulax leucolophus</i>	Seen at Doi Chiang Dao.
Lesser Necklaced Laughingthrush	<i>Garrulax monileger</i>	Seen at Kaeng Krachan.
Greater Necklaced Laughingthrush	<i>Garrulax pectoralis</i>	Seen at Kaeng Krachan.
White-browed Laughingthrush	<i>Garrulax sannio</i>	Seen at Doi Ang Khang.
Chestnut-crowned Laughingthrush	<i>Garrulax erythrocephalus</i>	Seen at Doi Inthanon & heard at Doi Ang Khang.
Red-faced Liocichla	<i>Liocichla phoenicea</i>	Seen at Doi Ang Khang.
Puff-throated Babbler	<i>Pellorneum ruficeps</i>	Seen at Kaeng Krachan & heard at Doi Chiang Dao.
Black-capped Babbler	<i>Pellorneum capistratum</i>	Seen at Khao Nor Chuchi.
Moustached Babbler	<i>Malacopteron magnirostre</i>	Seen at Khao Nor Chuchi.
White-browed Scimitar-Babbler	<i>Pomatorhinus schisticeps</i>	Seen at Kaeng Krachan & heard at Doi Ang Khang.
Limestone Wren-Babbler	<i>Napothera crispifrons</i>	Seen at Doi Ang Khang.
Streaked Wren-Babbler	<i>Napothera brevicaudata</i>	Seen at Doi Chiang Dao.
Eyebrowed Wren-Babbler	<i>Napothera epilepidota</i>	Seen at Doi Inthanon.
Pygmy Wren-Babbler	<i>Pnoepyga pusilla</i>	Seen at Doi Inthanon.
Rufous-fronted Babbler	<i>Stachyris rufifrons</i>	Seen at Doi Chiang Dao. Heard at Kaeng Krachan & Doi Inthanon.
Golden Babbler	<i>Stachyris chrysaee</i>	Seen at Doi Inthanon & heard at Doi Ang Khang.
Chestnut-rumped Babbler	<i>Stachyris maculata</i>	Seen at Khao Nor Chuchi.
Striped Tit-Babbler	<i>Macronous gularis</i>	Seen at Kaeng Krachan, Khao Nor Chuchi, Doi Inthanon & Doi Chiang Dao.
Silver-eared Mesia	<i>Leiothrix argentauris</i>	Seen at Doi Inthanon & Doi Ang Khang.
White-browed Shrike-Babbler	<i>Pteruthius flaviscapris</i>	Seen at Kaeng Krachan, Doi Chiang Dao & Doi Ang Khang.
Chestnut-fronted Shrike-Babbler	<i>Pteruthius aenobarbus</i>	Seen at Doi Inthanon.
White-hooded Babbler	<i>Gampsorhynchus rufulus</i>	Seen at Kaeng Krachan.
Spectacled Barwing	<i>Actinodura ramsayi</i>	Seen at Doi Inthanon & Doi Ang Khang.
Blue-winged Minla	<i>Minla cyanouroptera</i>	Seen at Doi Inthanon.
Chestnut-tailed Minla	<i>Minla strigula</i>	Seen at Doi Inthanon.
Rufous-winged Fulvetta	<i>Alcippe castaneiceps</i>	Seen at Doi Inthanon.
Gray-cheeked Fulvetta	<i>Alcippe morrisonia</i>	Seen at Doi Inthanon & Doi Ang Khang.
Rufous-backed Sibia	<i>Heterophasia annectens</i>	Seen at Doi Inthanon & Doi Ang Khang.
Black-backed Sibia	<i>Heterophasia melanoleuca</i>	Seen at Doi Inthanon & Doi Ang Khang.
Striated Yuhina	<i>Yuhina castaniceps</i>	Seen at Doi Chiang Dao.
White-bellied Yuhina	<i>Yuhina zantholeuca</i>	Seen at Doi Chiang Dao.
Great Tit	<i>Parus major</i>	Seen at Doi Chiang Dao.
Yellow-cheeked Tit	<i>Parus spilonotus</i>	Seen at Doi Inthanon & Doi Ang Khang.
Chestnut-vented Nuthatch	<i>Sitta nagaensis</i>	Seen at Doi Inthanon.
Velvet-fronted Nuthatch	<i>Sitta frontalis</i>	Seen at Kaeng Krachan, Doi Inthanon & Doi Chiang Dao.
Giant Nuthatch	<i>Sitta magna</i>	Seen at Doi Chiang Dao.
Brown-throated Treecreeper	<i>Certhia discolor</i>	Seen at Doi Inthanon.
Ruby-cheeked Sunbird	<i>Chalcoparia singalensis</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Plain-throated Sunbird	<i>Anthreptes malacensis</i>	Seen at Khao Nor Chuchi.
Purple-naped Sunbird	<i>Hypogramma hypogrammicum</i>	Seen at Khao Nor Chuchi.
Purple-throated Sunbird	<i>Leptocoma sperata</i>	Seen at Khao Nor Chuchi.
Purple Sunbird	<i>Cinnyris asiaticus</i>	Seen at Doi Inthanon.
Olive-backed Sunbird	<i>Cinnyris jugularis</i>	Seen at Kaeng Krachan.
Gould's Sunbird	<i>Aethopyga gouldiae</i>	Seen by guide at Doi Inthanon.
Green-tailed Sunbird	<i>Aethopyga nipalensis</i>	Seen at Doi Inthanon.
Black-throated Sunbird	<i>Aethopyga saturata</i>	Seen at Kaeng Krachan, Doi Inthanon & Doi Ang Khang.
Thick-billed Spiderhunter	<i>Arachnothera crassirostris</i>	Seen at Khao Nor Chuchi.
Spectacled Spiderhunter	<i>Arachnothera flavigaster</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Little Spiderhunter	<i>Arachnothera longirostra</i>	Seen at Kaeng Krachan, Khao Nor Chuchi, Doi Chiang Dao & Doi Ang Khang
Yellow-eared Spiderhunter	<i>Arachnothera chryso-genys</i>	Seen at Khao Nor Chuchi.
Gray-breasted Spiderhunter	<i>Arachnothera modesta</i>	Seen at Khao Nor Chuchi.
Streaked Spiderhunter	<i>Arachnothera magna</i>	Seen at Kaeng Krachan, Doi Inthanon & Doi Chiang Dao. Heard at Doi Ang Khang.
Yellow-breasted Flowerpecker	<i>Prionochilus maculates</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.

Crimson-breasted Flowerpecker	<i>Prionochilus percussus</i>	Seen at Khao Nor Chuchi.
Thick-billed Flowerpecker	<i>Dicaeum agile</i>	Seen at Khao Nor Chuchi.
Yellow-vented Flowerpecker	<i>Dicaeum chrysorrheum</i>	Seen at Khao Nor Chuchi.
Yellow-bellied Flowerpecker	<i>Dicaeum melanoxanthum</i>	Seen at Doi Ang Khang.
Orange-bellied Flowerpecker	<i>Dicaeum trigonostigma</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Plain Flowerpecker	<i>Dicaeum concolor</i>	Seen at Doi Inthanon.
Fire-breasted Flowerpecker	<i>Dicaeum ignipectus</i>	Seen at Doi Inthanon & Doi Chiang Dao.
Scarlet-backed Flowerpecker	<i>Dicaeum cruentatum</i>	Seen at Kaeng Krachan, Khao Nor Chuchi, Doi Inthanon & Doi Chiang Dao.
Chestnut-flanked White-eye	<i>Zosterops erythropleurus</i>	Seen at Doi Ang Khang.
Oriental White-eye	<i>Zosterops palpebrosus</i>	Seen at Kaeng Krachan.
Japanese White-eye	<i>Zosterops japonicus</i>	Seen at Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Dark-throated Oriole	<i>Oriolus xanthonotus</i>	Seen at Khao Nor Chuchi.
Black-naped Oriole	<i>Oriolus chinensis</i>	Seen at Kaeng Krachan.
Black-hooded Oriole	<i>Oriolus xanthornus</i>	Seen at Khao Nor Chuchi & heard at Doi Chiang Dao.
Maroon Oriole	<i>Oriolus traillii</i>	Seen at Doi Inthanon & Doi Chiang Dao. Heard at Doi Ang Khang.
Asian Fairy-bluebird	<i>Irena puella</i>	Seen at Kaeng Krachan.
Brown Shrike	<i>Lanius cristatus</i>	Seen at Pak Thale, Doi Chiang Dao & Chiang Saen.
Burmese Shrike	<i>Lanius collurioides</i>	Seen at Doi Chiang Dao.
Long-tailed Shrike	<i>Lanius schach</i>	Seen at Doi Ang Khang.
Gray-backed Shrike	<i>Lanius tephronotus</i>	Seen at Doi Inthanon.
Large Woodshrike	<i>Tephrodornis gularis</i>	Seen at Doi Chiang Dao.
Rufous-winged Philentoma	<i>Philentoma pyrrhopterum</i>	Seen at Khao Nor Chuchi.
Black Drongo	<i>Dicrurus macrocercus</i>	Seen at Pak Thale, Doi Inthanon, Doi Chiang Dao & Chiang Saen.
Ashy Drongo	<i>Dicrurus leucophaeus</i>	Seen at Kaeng Krachan, Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Crow-billed Drongo	<i>Dicrurus annectans</i>	Seen at Khao Nor Chuchi.
Bronzed Drongo	<i>Dicrurus aeneus</i>	Seen at Kaeng Krachan, Doi Inthanon, Doi Chiang Dao & Doi Ang Khang.
Lesser Racket-tailed Drongo	<i>Dicrurus remifer</i>	Seen at Kaeng Krachan, Doi Inthanon & Doi Ang Khang.
Hair-crested Drongo	<i>Dicrurus hottentottus</i>	Seen at Kaeng Krachan & Doi Inthanon.
Greater Racket-tailed Drongo	<i>Dicrurus paradiseus</i>	Seen at Kaeng Krachan & Doi Inthanon.
Ashy Woodswallow	<i>Artamus fuscus</i>	Seen at most sites.
Eurasian Jay	<i>Garrulus glandarius</i>	Seen at Doi Inthanon.
Blue Magpie	<i>Urocissa erythrorhyncha</i>	Seen at Doi Inthanon.
Green Magpie	<i>Cissa chinensis</i>	Seen at Kaeng Krachan.
Gray Treepie	<i>Dendrocitta formosae</i>	Seen at Kaeng Krachan, Doi Chiang Dao & Doi Ang Khang.
Ratchet-tailed Treepie	<i>Temnurus temnurus</i>	Seen at Kaeng Krachan.
Large-billed Crow	<i>Corvus macrorhynchos</i>	Seen at Krabi, Doi Inthanon & Doi Chiang Dao.
Asian Glossy Starling	<i>Aplonis panayensis</i>	Seen at Krabi.
Common Hill Myna	<i>Gracula religiosa</i>	Seen at Kaeng Krachan.
White-vented Myna	<i>Acridotheres grandis</i>	Seen at Pak Thale, Kaeng Krachan, Doi Chiang Dao & Chiang Saen.
Common Myna	<i>Acridotheres tristis</i>	Seen at most sites.
Black-collared Starling	<i>Gracupica nigricollis</i>	Seen at Pak Thale, Doi Inthanon, Doi Chiang Dao & Chiang Saen.
Asian Pied Starling	<i>Gracupica contra</i>	Seen at Kaeng Krachan.
White-rumped Munia	<i>Lonchura striata</i>	Seen at Kaeng Krachan.
Nutmeg Mannikin	<i>Lonchura punctulata</i>	Seen at Doi Inthanon & Chiang Saen.
Common Rosefinch	<i>Carpodacus erythrinus</i>	Seen at Doi Ang Khang.
House Sparrow	<i>Passer domesticus</i>	Seen at Kaeng Krachan & Khao Nor Chuchi.
Plain-backed Sparrow	<i>Passer flaveolus</i>	Seen at Pak Thale.
Eurasian Tree Sparrow	<i>Passer montanus</i>	Seen at all sites
