Itinerary:
5 March     Arrival/Night in Quito.
6 March     Antisana Ecological Reserve, Papallacta Pass/Night in Guango Lodge.
7 March     Papallacta Pass and Guango/Night in Cabañas San Isidro.
8 March     San Isidro area/Night Cabañas San Isidro.
9 March     Guacamayos Ridge, Loreto Road and WildSumaco/Night WildSumaco.
10-11 March WildSumaco Area/Nights Wild Sumaco.
12 March    Wild Sumaco and travel to Napo Wildlife Center/Night Napo Wildlife Center.
13-14 March Napo Wildlife Center
15 March    Napo Wildlife Center to Sacha Lodge/Night Sacha Lodge.
16-17 March Sacha Lodge
18 March    Sacha Lodge, Coca, and fly to Quito/Night Quito.
19 March    Departure.
6 March. We all met up early at the Hotel Sebastian in Quito, and I introduced myself and our driver Nico, before heading up to the Antisana Reserve, all excited to visit this new and beautiful place. Even for me, I never get tired of it. We started looking for some of the target species, and it was great to see at least four Giant Hummingbirds, Black-tailed Trainbearer, Shining Sunbeam, Plain-breasted Hawk, Black-chested Buzzard-Eagle, Variable Hawk, Red-crested Cotinga, Southern Yellow-Grosbeak, Yellow-breasted Brush-Finch, Tufted Tit-Tyrant, and a Brown-backed Chat-Tyrant. It was a great start, so we continued going up the road, where we got the chance to pick up Black-winged Ground-Dove and Streak-backed Canastero, which sometimes can be very difficult, Paramo Pipit, Paramo Ground-Tyrant, Plumbeous Sierra-Finch, and a fantastic view of the Aplomado Falcon shown here. As we reached on the top of the Antisana Reserve, in the regular spot, we found hundreds of Carunculated Caracaras digging on the ground searching for their food, about same number of Andean Gulls, at least 10 pairs of the threatened Black-faced Ibis, and the lovely Andean Lapwing. On the way we visited a hacienda, where they have hummer feeders that attract the Ecuadorian Hillstar, which luckily we saw. As we were heading towards Mica Lake, we were really excited to spot a perched Andean Condor, perhaps the most wanted species in this reserve. The lake itself provided some good species like Andean Ruddy-Duck, Yellow-billed Pintail, Andean Coot, Andean Teal, and the cute Silvery Grebe.

After our lunch, we headed to Papallacta Pass. After two hours driving we got to this freezing place, above 13,000 ft., and stopped for Bar-winged and Stout-billed Cinclodes, but were lucky to see the elusive Red-rumped Bush-Tyrant, which some of my colleagues would be jealous of. Later in the afternoon we arrived at Guango Lodge where we would spend the night; once our bags were unloaded, we watched the hummer feeders, where we picked up nine hummingbird species: Tourmaline Sunangel, Chestnut-breasted and Buff-tailed Coronets, Speckled Hummingbird, Long-tailed Sylph, White-bellied Woodstar, Sparkling Violet-ear, Tyrian Metaltail, and Collared Inca. After the feeders we went for short walk on one of the Guango Lodge trails. There wasn’t much of the day left but we had more luck with Mountain Cacique, Hooded Mountain-Tanager, and rare Dusky Piha and a pair of Torrent Ducks from the bridge. It was a great first day, with wonderful birds!

7 March. The first part of the morning we birded around Guango, fortunately it wasn’t raining, so this easy morning walk gave us Andean Guan, Gray-breasted Mountain-Toucan, Slaty and Pale-naped Brush-Finches, White-banded Tyrannulet, Turquoise Jay, Blue-backed and Capped Conebills, Mountain Wren, Hooded Mountain-Tanager, Blue-and-black Tanager, and by the bridge we got a White-capped Dipper and another Torrent Duck.

Late in the morning we went up to Papallacta Pass, fortunately the weather was all right, and we got great views of Many-striped Canastero, Andean Tit-Spinetail, Blue-mantled Thornbill, the bush-top singer Tawny Antpitta, Grass Wren, plus some other birds that we had seen yesterday. After lunch at the lodge we headed to the EMAAP road behind the hot springs, so this spot provided us a few new bird species like; Scarlet-bellied Mountain-Tanager, White-chinned Thistle-tail, White-throated Tyrannulet, Great Saphirewing, Buff-winged Starfrontlet, Viridian Metaltail, and Glossy
Flowerpiercer. After that we drove all the way down to Cabañas San Isidro for the night. After dinner, while going back to our cabins there it was! The San Isidro “Mystery Owl” waiting for some insects to come near the light pole. Unfortunately no one still knows what species it really is.

8 March. After our breakfast we birded near the cabins, since they leave the lights on during the night, which attracts some bugs and moths. This place provided some easy views of regular birds that come in to feed: the handsome Inca Jay, Subtropical Cacique, Pale-eyed Thrush, the cute Rufous-crowned Tody-Flycatcher, Cinnamon and Rufous-breasted Flycatchers, Black-billed Peppershrike (sometimes very secretive), Barred Becard, Montane and Olive-backed Woodcreepers, a few cool looking Pearled Treerunners, Masked Trogon, Canada Warbler, and Fawn-breasted Tanager. After this fantastic early show, we went to see the White-bellied Antpitta that the lodge workers feed at 7:30, fortunately we got a great view of it. Once we finished here, we went down what I call the Yanayacu road, which is the road past the San Isidro entrance road. It’s an open wide dirt road making it easy for everyone to get on the birds. Soon we got an Emerald Toucanet, Long-tailed Antbird, and fantastic views of Blackish Tapaculo, that was lucky because normally this family is very difficult to see. Some of the group also spotted a Highland Motmot singing away, and Golden-headed Quetzal didn’t disappoint. Further along the road, we had a huge mixed feeding flock working in front of us, where we were able to find Crimson-mantled Woodpecker, Olivaceous Siskin, Black-eared Hemispingus, Golden-collared Honeycreeper, Black-capped, Beryl-spangled and the handsome Saffron-crowned Tanagers, White-tailed and Sulphur-bellied Tyrannulets, and a Pale-edged Flycatcher. In a cow pasture we spotted the resident Southern Lapwings feeding on the ground. After lunch we went to check the hummingbird feeders where most of then were our old friends now, but the Bronzy Inca was new for the trip. An afternoon trail walk gave us some other species like Long-tailed Tapaculo, Green-and-black Fruiteater, and a migrant Black-and-white Warbler. Then a little flock came with Variegated Bristle-Tyrant and the elusive Bicolored Antvireo which we were very lucky to find. Unfortunately we couldn’t see the Peruvian Antpitta that was singing quietly close to the Macucaloma trail. At dusk we headed toward to Guacamayos ridge to try the night birds, and with more luck we saw Rufous-bellied Nighthawk and Swallow-tailed Nightjar flying above the ridge, and a perched Andean Potoo. It was one of the best birds of the trip, since most of the time it is so hard to find.

9 March. As we followed our itinerary today, we went to the Guacamayos ridge; this narrow ridge with cloudforest can provide some interesting birds, and fortunately we had good weather. This downhill trail brought us colorful species like Grass-green, Blue-and-black, and Flame-faced Tanagers and Lacrimose and Hooded Mountain-Tanagers. We got a great view of a pair of Spillmann’s Tapaculos, as well as the spotty and colorful Ocellated Tapaculo and a Powerful Woodpecker. A little mixed feeding flock gave us Dusky Piha, Streaked Flycatcher, Streaked Tuftedcheeck, Rufous Wren, and a Handsome Flycatcher that came in to our playback. Later we drove all the way down to WildSumaco, stopping in a couple of places, where we picked up the handsome Cliff Flycatcher as well as White lined Tanager and Lafresnaye’s Piculet.

We arrived in time to check the hummer feeders, and these attracted some species such as Gould’s Jewelfront, Golden-tailed Sapphire (check out the photo), Booted Racket-tail, Violet-headed and Many-spotted Hummingbird. A short walk on the trail behind the lodge got us Montane Foliage-Gleaner, Maroon-tailed Parakeet, Scarlet Tanager, Collared Trogon, Dusky Spinetail, White-winged Becard, Blue-necked Tanager, Gilded Barbet, a Scaled Pigeon calling from a dead tree top, and quite a good view of a Black-mandibled Toucan.
10 March. We started with some roadside birding, this brought some easy good birds like Blackish Antbird, Crimson-crested Woodpecker, Yellow-cheeked Becard, Grayish Saltator, Chestnut-bellied Seed-Finch, Black-and-white Seedeater, and a flyover Barred Forest-Falcon. Once we reached the FACE trail we managed to see Black-faced Antbird and Plain Antvireo near the beginning. Farther downhill we spotted a small flock with Yellow-breasted and Rufous-winged Antwrens, Coppery-chested Jacamar, and Euler’s and Ornate Flycatchers. Also along the trail there was a White-crowned Manakin lek where we nicely saw them doing their display. On the way back we caught up with another mixed flock with Russet Antshrike, a Gray-mantled Wren creeping around the brush, Slaty-capped Shrike-Vireo, Orange-eared Tanager, and Golden-faced Tyrannulet.

Later in the afternoon after lunch, we birded along the Pacto Sumaco Road, and this easy walk gave us a chance to see some of the birds that we were missing. So we started by seeing the sluggish Striolated Puffbird, followed by a flock of Spotted-fronted Swift, which turned out to be the first record for the lodge, which was really neat. Another feeding flock brought some new species: Olivaceous and Rufous-naped Greenlets, Red-headed Barbet, and Blue-browed, Paradise, Spotted and Golden Tanagers (without doubt the most beautiful bird family!), Ash-browed Spinetail, Streaked Xenops, Lined Antshrike, and a Golden-collared Toucanet in a fruiting Cecropia tree. The feeders at the old residential area are always best in the late afternoon, so we headed down there and they were really pumping, with Ecuadorian Piedtail, Napo Sabrewing (photo above), Green and Gray-chinned Hermits, and Black-throated and Violet-fronted Brilliants.

11 March. After an early breakfast, we went to Piha Trail, and even though it was hard work, we did see some magnificent birds; we got stunning views of Northern White-crowned Tapaculo, Short-tailed Anthrush, Foothill Antwren, a Long-tailed Tyrant flycatching from one spot, and Ecuadorian Tyrannulet. As we went down on the Piha trail we saw an Andean Cock-of-the-rock flying cross the trail, Fulvous Shrike-Tanager, the rare Fiery-throated Fruiteater, Orange-crested Flycatcher, White-breasted Wood-Wren, and heading back to the lodge we saw also Blue-fronted Lancebill. In the afternoon drove to the Papanco Road, and this unknown road turned out to be very good starting with Red-billed Tyrannulet, and Yellow-shouldered Grosbeak seemed to be everywhere, which was kind of odd, because I’d never seen that many in one day. Hairy-crested Antbird came out with our playback, and that was another unexpected species from the area. In a tiny bamboo patch a Large-headed Flatbill started to call and then came out, then we saw Dark-breasted Spinetail, White-backed Fire-eye, Little Woodpecker, Yellow-bellied and Black-faced Dacnises, then topped the superb afternoon off with a stunning view of Blue-naped Chlorophonia. At dusk back near the lodge, we tried for Band-bellied Owl, it was a bit shy but came out anyway.
12 March. We knew this is our last morning at WildSumaco, so we decided to bird a bit along the dirt road toward to main highway. Fortunately we did see some of the species that we were missing in the area, and before leaving the patio we even saw Gorgeted Woodstar, Wire-crested Thorntail, and Chestnut-fronted Macaw. Down the road we had good luck with Coraya Wren, Slate-colored Grosbeak, Swallow Tanager and the rare and cute Rufous-breasted Piculet. After two hours driving, we reached Coca, an old oil town, which is in between the confluence of the Coca and Napo Rivers. We took a break then got in boats, and after two and half hours along this mighty Amazon basin river we arrived at the Napo Wildlife Center dock. After being introduced to our local guide Mariano, we rode in a long dugout canoe up the Añangu creek. This was the real live jungle life, and it was exciting to finally arrive. We started seen some riverside species like Greater Ani, Green, Ringed, and Green and Rufous Kingfishers (most of the time flying in front up us), and beautiful White-chinned and White-eared Jacamars, looking like huge hummers, catching bags from the same perch. A lovely and noisy Lesser Kiskadee sat on a bare branch while Snail and Slender-billed Kites hunted for snails nearby. This well-located lodge run by the local indigenous Quichua community gave us a welcome to their home, which also would be our home for next three nights. Once we dropped our stuff in our room, we did a little birding around the lodge, as we picked up a nice perched Greater Yellow-headed Vulture, and Neotropical Palm-Swifts and Short-tailed Swifts were gliding nearby. We saw also a couple of migrant species, Fork-tailed Flycatcher and Eastern Kingbird, and of course we enjoyed the prehistoric Hoatzin, one of the only leaf-eating birds, nesting very close to the water’s edge and feeding on the Anthuriun and Philodendron plants. That was pretty good way to finish a pretty long travel day.

13 March 13. We had an early breakfast and walked to the wooden canopy tower, which is just about 40 meters above the ground. Actually, the platform is built just below the treetop, so this high elevation view gave us a chance to search for some canopy species that you won’t see from the ground. Before getting their we had great views of a Black-banded Woodcreeper, that came in to our call. Once we arrived at the tower and climbed the stairs, there were birds waiting for us, despite light rain, which
didn’t chase us away. From this high perch, we saw the Many-banded Aracari, Ivory-billed Aracari (photo right), Channel-billed and White-throated Toucans vocalizing from the treetops, Black-faced Dacnis, ornamental Black-headed Parrots, loud Mealy and Yellow-crowned Parrots, the cute and almost tailless Pygmy Antwren, Dusky-chested Flycatcher, Purple-throated Fruitcrow, Red-throated Caracara, and Slate-colored Hawk. Returning to the lodge, the trail provided some understory species like Plain-throated, White-flanked, and Gray Antwrens, Striated Anthrush, Buff-throated and Straight-billed Woodcreepers, and a Capped Heron by the lake. After lunch we birded along the Añangu creek, which was quite productive. Just getting to the creek, we saw the very shy (at least in my experience) Azure Gallinule showing nicely for all of us. Also the creek itself brought us more river edge specialties like Silvered, Plumbeous, and White-shouldered Antbirds, White-bearded and Rufous-breasted Hermits, and Chestnut-bellied and Blue-and-yellow Macaws gathering together for the night. Mariano knew where to find a roosting Great Potoo, then we continued with Cinnamon Attila, Limpkin, and Little Cuckoo. This creek is great for one particularly shy and elusive species, I’m talking about the Zigzag Heron, and it came curiously to our call. Before going back, we ended up with nice views of Blackish Nightjar, which seems to be resident here, which is kind of odd, because usually in Ecuador it occurs mainly in the foothills. It was a great day, not huge numbers but fantastic birds.

14 March. On our second full day at Napo Wildlife Center, we tried the Tiputini trail. This long trail has both varzea forest and terra firme, we went deep into the jungle for most of the day. Just getting into the jungle, I heard a high whistle, a Lanceolated Monklet was singing. It took a long time to find it and we almost gave up, but I knew this species is much coveted by a lot of birders, so it was worth the time. We finally started along the trail, and soon a small feeding flock brought us Cinereous, Dusky-throated, and Spot-winged Antshrikes, Chestnut-winged Hookbill, Long-winged Antwren, and Fulvous-crested Tanager. Also along the trail we got great views of a Rusty-belted Tapaculo, which everyone was happy about. It was quiet for a while then we got lucky and saw a Lunulated Antbird, followed by the more common Spot-winged Antbird as well. After a while, Mariano got us another roosting bird, this time was even better, Long-tailed Potoo (photo left). On the way back, Blue-crowned Motmot, White-necked Thrush, and Green-backed, Violaceous, and Black-throated Trogons showed themselves, and we tracked down a Great Jacamar that was calling like a baby cat. It was a fun walk, and we even saw Jaguar footprints.
15 March. After an early breakfast we went down the creek, heading for the parrot clay licks on our last morning at Napo Wildlife Center. On the way there we saw some a pair of Dot-backed Antbirds, a Blue-black Grosbeak, and even another Zigzag Heron, which was pretty nice. The first clay lick had lots of Blue-headed, Yellow-crowned, and Mealy Parrots and Dusky-throated Parakeet, which were all together consuming the minerals that the cliff contains. We did a little birding along the Napo River, which I think was quite productive, as we saw Drab Water-Tyrant, Pied Plover, Cocoi Heron standing near shore, a sleeping Ladder-tailed Nightjar on one of the cane branches. On the way to second clay lick, we also saw some spectacular birds, including nesting White-chested Puffbird and Sapphire Quail-Dove (photo above) just by the path and a Rufous-capped Anthrush. At the “pericos” clay lick there were hundreds and hundreds of Cobalt-winged Parakeets and Scarlet-shouldered Parrotlets, as well as at least one cute Orange-cheeked Parrot. Also in the area we saw Great Black-Hawk, who was perched above the blind chasing the smaller birds. The up and down going trail just behind the hide gave us some interesting species, Scarlet Macaw, Brown Nunlet, Mouse-colored Antshrike, and Blue-crowned, Golden-headed and handsome Striped Manakins. After lunch, we went to try the Chestnut-headed Crake, and we had the most stunning views I’ve ever had in my life when a pair of them came to check us out. A great way to finish our visit to Napo Wildlife Center. We arrived at the Sacha Lodge dock late in the afternoon, and on the walk to the lake, we saw Black-fronted Nunbird, Elegant Woodcreeper, and a roosting Great Potoo along the boardwalk. As it was getting dark, we saw a couple new nightbirds for the trip, Common Pauraque and Common Potoo.

16 March. Staying at Sacha Lodge is always enjoyable; such great food, friendly people, nice accommodation, and it’s a fantastic place for birding. First on the schedule, we went to visit the canopy walkway, which is located half an hour walk from the lodge, and this 45 meter metal bridge with towers gives you good chances to see a lot of bird species. Before getting there, along the trail we found Sooty and Warbling Antbirds. After climbing the stairs, a little canopy mixed feeding flock showed up with Rufous-bellied Euphonia, Green-and-gold, Flame-crested, and Paradise Tanagers, Slender-footed Tyrannulet, land the tiny Short-billed Antwren. Nearby we spotted White-browed Purpuleft and Spangled and Plum-throated Cotingas on the tree tops. Scanning the treetops around the tower, we saw some other species that we had seen before, such as toucans and aracaris, but luckily we also spotted other new species for the trip, Purple and Red-legged Honeycreepers, Pink-throated Becard, a displaying Moriche Oriole, and a Black-tailed Trogon sitting under the subcanopy. Before leaving the canopy walkway, a Cinnamon-throated Woodcreeper and the lovely Purplish Jacamar showed nicely for us. Hang on, I forgot to mention the Black Hawk-Eagle, who was sitting and drying itself out on a dead tree top. On the way back to lodge along the trail, there was the melodic singer Musician Wren who came out and sat for a while, a friendly Black-faced Anthrush that walked across the trail a couple times giving us decent views, and the cute Wire-tailed Manakin gave us a hard time trying to find him, but we did as you can see from the photo on the next page. Late in the afternoon, after lunch, we headed to the wooden tower. Here there is a platform on a ceiba or kapok tree, which is just above 40 meters high. But first of all we did some birding at the Orquideas creek, which provided us with Orange-throated Manakin and a Tawny-bellied Screech Owl, who was sleeping in hole in a tree. Once we were on the tower, it was kind of slow, which is normal for the afternoon, but we saw some good ones like Chestnut Woodpecker, local Yellow-browed Tody-Flycatcher, Opal-rumped
and Turquoise Tanagers, Green Honeycreeper, and a Purple-throated Fruitcrow feeding near the tower. Just before bailing out because of a storm, someone asked what was the black bird with a crest, and without doubt it was a lovely Amazonian Umbrellabird. Unfortunately we couldn’t stay any longer on the tower saw we headed back to lodge, to enjoy our dinner and make a plan for the next day.

17 March. As today was our last full day in the area, and most of the participants were kind of tired, we tried for some easier birding, so we went to the river and did some birding from the boat and stopped at a river island. We got serious rain almost all day, which made it tough. Before it started, along the boardwalk we spotted some birds like Blue-crowned Motmot, Slender-billed Kite sitting on the hand railing, and Gray-fronted Dove. Once we were on the river, the heavy rain chased us back to dock, to be under the shelter, but along the shore we saw Collared and Pied Plovers, Yellow-billed Tern, Greater Yellowlegs, and before the rain, on the island, we saw Oriole Blackbird and White-bellied Spintail. In the afternoon with light rain we headed to different island up the river from the dock, which fortunately brought us the beautiful Rufous-headed Woodpecker, which came to my playback, and the same island had Castelnau’s Antshrike, and a pair of them circled us. Birding by the dock we were able to see Solitary Cacique and Lemon-throated and Scarlet-crowned Barbets, feeding on a fruiting tree after the rain. On the way back to lodge by the lake, there were a group of Rufous-sided Crakes on both sides of the creek and a Red-capped Cardinal worked near the water. Just when I thought we were going to miss the bright and handsome Cream-colored Woodpecker, one flew in and landed in a fresh water mangrove tree. Anyway it wasn’t a bad day at all, even with the rain.

March 18. We knew today was our last day in the Amazon, and it was kind of sad to leave, but such is the birding life, you have to move around. We tried to do some birding before leaving Sacha, so we started a bit early and we birded along the boardwalk. The first to come out was Ferruginous Pygmy-Owl, Speckled Chachalaca, Orange-fronted Plushcrown, Long-billed Woodcreeper, and the noisy Violaceous Jay, not a bad goodbye from Sacha. Once we started up river in the boat, toward Coca City, we spotted a few more birds that we were looking for, such as a Black Caracara flying in front of us, and much further up I spotted a Bat Falcon resting on a dead snag, and there were Swallow-wing Puffbirds flying out from the same branch. The last two new species of the trip were Amazon Kingfisher and a Yellow-headed Caracara that we saw just before arriving back in Coca. As I said even with some rain and some slow birding on some of the days, we saw a bunch of good birds. Thanks to all of the participants, for their patience and friendship, and for coming with us. We flew back to Quito and ended up our trip with a nice celebratory dinner.
**BIRD LIST**
This list includes all the bird species that were recorded by at least one of the group, including the leader. Taxonomy and nomenclature follow: *Clements, James F. The Clements Checklist of Birds of the World. Sixth Edition, 2007, Ithaca, NY: Cornell University Press*, including all updates through December 2009. H=heard only.

Our total tally of the trip was **534** species **seen** and at least **70** species only **heard**.

Falco sparverius  
Falco femoralis  
Falco rufigularis  
**RALLIDAE**  
Anurolimnas castaneiceps  
Anurolimnas fasciatus  
Laterallus melanophaius  
Porphyrio flavirostris  
Fulica ardesiaca  
**ARAMIDAE**  
Aramus guarauna  
**CHARADRIIDAE**  
Vanellus cayanus  
Vanellus chilensis  
Vanellus resplendens  
Charadrius collaris  
**SCOLOPACIDAE**  
Actitis macularius  
Tringa melanoleuca  
Calidris minutilla  
Calidris bairdii  
**LARINAE**  
Chroicocephalus serranus  
**STERNINAE**  
Sternula superciliaris  
**COLUMBIDAE**  
Columba livia  
Patagioenas speciosa
Band-tailed Pigeon
Pale-vented Pigeon
Plumbeous Pigeon
Ruddy Pigeon
Eared Dove
Ruddy Ground-Dove
Black-winged Ground-Dove
Gray-fronted Dove
Sapphire Quail-Dove
White-throated Quail-Dove
Ruddy Quail-Dove

PARROTS
Maroon-tailed Parakeet
White-eyed Parakeet
Dusky-headed Parakeet
Chestnut-fronted Macaw
Military Macaw
Scarlet Macaw
Blue-and-yellow Macaw
Red-bellied Macaw
Cobalt-winged Parakeet
Scarlet-shouldered Parrotlet
Black-headed Parrot
Orange-cheeked Parrot
Blue-headed Parrot
Red-billed Parrot
Orange-winged Parrot
Mealy Parrot (Amazon)
Yellow-crowned Parrot (Amazon)

HOATZIN
Hoatzin

CUCKOOS
Little Cuckoo
Squirrel Cuckoo
Black-bellied Cuckoo
Greater Ani
Smooth-billed Ani

NIGHTJARS
Rufous-bellied Nighthawk
Common Pauraque
Blackish Nightjar
Ladder-tailed Nightjar
Swallow-tailed Nightjar

POTOOS
Great Potoo
Long-tailed Potoo
Common Potoo
Andean Potoo

SWIFTS
Spot-fronted Swift
Chestnut-collared Swift
White-collared Swift
Short-tailed Swift
Gray-rumped Swift
Lesser Swallow-tailed Swift
Fork-tailed Palm-Swift

HUMMINGBIRDS
Rufous-breasted Hermit
White-bearded Hermit
Green Hermit
Tawny-bellied Hermit
Straight-billed Hermit
Great-billed Hermit
Black-throated Hermit
Gray-chinned Hermit
Green-fronted Lancebill
Blue-fronted Lancebill
Gray-breasted Sabrewing
Napo Sabrewing
White-necked Jacobin
Green Violetear
Sparkling Violetear
Violet-headed Hummingbird
Wire-crested Thorntail
Fork-tailed Woodnymph
Golden-tailed Sapphire
Many-spotted Hummingbird
Speckled Hummingbird
Ecuadorian Piedtail
Black-throated Brilliant
Gould's Jewelfront
Fawn-breasted Brilliant
Buff-tailed Coronet
Chestnut-breasted Coronet
Shining Sunbeam
Ecuadorian Hillstar
Bronzy Inca
Collared Inca
Buff-winged Starfrontlet
Great Sapphirewing
Giant Hummingbird
Tourmaline Sunangel
Booted Racket-tail
Black-tailed Trainbearer
Tyrian Metaltail
Viridian Metaltail
Blue-mantled Thornbill

Nyctibius grandis
Nyctibius aethereus
Nyctibius griseus
Nyctibius maculosus

APODIDAE
Cypseloides cherriei
Streptoprocne rutila
Streptoprocne zonaris
Chaetura brachyura
Chaetura cinereiventris
Panyptila cayennensis
Tachornis squamata

TROCHILIDAE
Glaucis hirsutus
Phaethornis hispidus
Phaethornis guy
Phaethornis symatophorus
Phaethornis bourcieri
Phaethornis malaris
Phaethornis atrimentalis
Phaethornis griseogularis
Doryfera ludovicae
Doryfera johannae
Campylopterus largipennis
Campylopterus villaviscensio
Florisuga mellivora
Colibri thalassinus
Colibri coruscans
Klais guimeti
Discosura popelairii
Thalurania furcata
Chrysuronia oenone
Taphrospilus hypostictus
Adelomyia melanogenys
Phlogophilus hemileucurus
Heliodoxa schreiberi
Heliodoxa aurescens
Heliodoxa rubinoides
Boissonnaua flavescens
Boissonnaua matthewsii
Aglaeactis cupripennis
Oreotrochilus chimboraizo
Coeligena coeligena
Coeligena torquata
Coeligena lutetiae
Pterophanes cyanopterus
Patagona gigas
Heliangelus exortis
Ocreatus underwoodii
Lesbia victoriae
Metallura tyrannina
Metallura williami
Chalcostigma stanleyi
Long-tailed Sylph
White-bellied Woodstar
Gorgeted Woodstar

**TROGONS**
Golden-headed Quetzal
Black-tailed Trogon
Green-backed (Amaz. White-tailed) Trogon (Amazonian) Violaceous Trogon
Blue-crowned Trogon
Black-throated Trogon
Collared Trogon
Masked Trogon

**MOTMOTS**
Blue-crowned Motmot
Blue-crowned (Highland) Motmot
Rufous Motmot

**KINGFISHERS**
Ringed Kingfisher
Amazon Kingfisher
Green Kingfisher
Green-and-rufous Kingfisher
American Pygmy Kingfisher

**PUFFBIRDS**
White-necked Puffbird
Striolated Puffbird
White-chested Puffbird
Lanceolated Monklet
Brown Nunlet
Black-fronted Nunbird
White-fronted Nunbird
Swallow-winged Puffbird

**JACAMARS**
White-eared Jacamar
White-chinned Jacamar
Coppery-chested Jacamar
Purplish Jacamar
Great Jacamar

**NEW WORLD BARBETS**
Scarlet-crowned Barbet
Gilded Barbet
Lemon-throated Barbet
Red-headed Barbet

**TOUCANS**
Emerald Toucanet
Gray-breasted Mountain-Toucan
Black-billed Mountain-Toucan
Ivory-billed Aracari
Many-banded Aracari
Golden-collared Toucanet
Black-mandibled Toucan
White-throated Toucan
Channel-billed Toucan

**WOODPECKERS**

---

Aglaiocercus kingi
Chaetocercus mulsant
Chaetocercus heliodor

**TROGNONIDAE**
Pharomachrus auriceps
Trogon melanurus eumorphus
Trogon viridis viridis
Trogon violaceus crissalis
Trogon curucui
Trogon rufus
Trogon collaris
Trogon personatus

**MOMOTIDAE**
Momotus momota microstephanus
Momotus momota aequatorialis
Baryphthengus martii

**ALCEDINIDAE**
Megaceryle torquatus
Chloroceryle amazona
Chloroceryle americana
Chloroceryle india
Chloroceryle aenea

**BUCCONIDAE**
Notharchus hyperrynchus
Nystalus striolatus
Malacoptila fusca
Micromonacha lanceolata
Nonnula brunnea
Monasa nigrifrons
Monasa morphoeus
Chelidoptera tenebrosa

**GALBULIDAE**
Galbalcyrhynchus leucotis
Galbula tombacea
Galbula pastazae
Galbula chalcothorax
Jacamerops aureus

**CAPITONIDAE**
Capito aurovirens
Capito auratus
Eubucco richardsoni
Eubucco bourcierii

**RAMPHASTIDAE**
Aulacorhynchus prasinus
Andigena hypoglauca
Andigena nigrrostris
Pteroglossus azara
Pteroglossus pluricinctus
Selenidera reinwardtii
Ramphastos ambiguus
Ramphastos tucanus
Ramphastos vitellinus

**PICIDAE**
Lafresnaye's Piculet  
Picumnus lafresnayi
Rufous-breasted Piculet  
Picumnus rufiventris
Yellow-tufted Woodpecker  
Melanerpes cruentatus
Smoky-brown Woodpecker  
Picoides fumigatus
Little Woodpecker  
Veniliornis passerinus
Red-stained Woodpecker  
Veniliornis affinis
Golden-olive Woodpecker  
Colaptes rubiginosus
Crimson-mantled Woodpecker  
Colaptes rivoli
Spot-breasted Woodpecker  
Colaptes punctigula
Chestnut Woodpecker  
Celeus elegans
Cream-colored Woodpecker  
Celeus flavus
Rufous-headed Woodpecker  
Celeus spectabilis
Ringed Woodpecker  
Celeus torquatus
Lineated Woodpecker  
Campephilus pollens
Powerful Woodpecker  
Campephilus rubricollis
Red-necked Woodpecker  
Campephilus melanoleucos
Crimson-crested Woodpecker  
Campephilus melanoleucos

OVENBIRDS  
FURNARIIDAE
Tawny-throated Leaftosser  
Sclerurus mexicanus
Short-billed Leaftosser  
Sclerurus rufigularis
Black-tailed Leaftosser  
Sclerurus caudacutus
Stout-billed Cinclodes  
Cinclodes excelsior
Bar-winged Cinclodes  
Cinclodes fuscus
Andean Tit-Spinetail  
Leptasthenura andicana
White-chinned Thistletail  
Schizoeaca fuliginosa
Azara's Spinetail  
Synallaxis azarae
Dark-breasted Spinetail  
Synallaxis albigularis
Rufous Spinetail  
Synallaxis unirufa
White-bellied Spinetail  
Synallaxis propinqua
Dusky Spinetail  
Synallaxis moesta
Ash-browed Spinetail  
Cranioleuca curtata
Streaked Tuftedcheek  
Astenes wyatti
Many-striped Canastero  
Astenes flavmulata
Orange-fronted Plushcrown  
Metopothrix aurantiaca
Spotted Barbtail  
Premnoplex brunnescens
Pearled Treerunner  
Margaromis squamiger
Streaked Tuftedcheek  
Pseudocolaptes boissonneautii
Montane Foliage-gleaner  
Anabacerthia striatilis
Lineated Foliage-gleaner  
Syndactyla subalaris
Chestnut-winged Hookbill  
Ancistrops strigilatus
Chestnut-winged Foliage-gleaner  
Philydor erythropeterum
Black-billed Treehunter  
Thripadectes melanorhynchus
Striped Treehunter  
Thripadectes holostictus
Olive-backed Foliage-gleaner  
Automolus infuscatus
Streaked Xenops  
Xenops rutilans

WOODCREEPERS  
FURNARIIDAE/DENDROCOLAPTINAE
Olivaceous Woodcreeper  
Sittasomus griseicapillus amazonus
Wedge-billed Woodcreeper  
Glyphorynchus spirurus
Long-billed Woodcreeper  
Nasica longirostris
Cinnamon-throated Woodcreeper  
Dendrexetastes rufigula
Strong-billed Woodcreeper  
Xiphocolaptes promeropirhynchus
Black-banded Woodcreeper  
Dendrocolaptes picumnus
Straight-billed Woodcreeper  
Dendroplex picus
| **Elegant (Spix's) Woodcreeper** | Xiphorhynchus (spixii) elegans |

Red-eyed Vireo - *Vireo olivaceus*
Yellow-green Vireo - *Vireo flavoviridis*
Rufous-naped Greenlet - *Hylophilus semibrunneus*
Olivaceous Greenlet - *Hylophilus olivaceus*
Tawny-crowned Greenlet - *Hylophilus ochraceiceps*
Slaty-capped Shrike-Vireo - *Vireolanius leucotis*
Black-billed Peppershrike - *Cyclarhis nigrirostris*

**CROWS JAYS AND MAGPIES**

Green (Inca) Jay - *Cyanocorax yncas yncas*
Violaceous Jay - *Cyanocorax violaceus*
Turquoise Jay - *Cyanolyca turcosa*

**SWALLOWS**

Blue-and-white Swallow - *Pygochelidon cyanoleuca*
Brown-bellied Swallow - *Orochelidon murina*
White-thighed Swallow - *Atticora tibialis*
White-banded Swallow - *Atticora fasciata*
Southern Rough-winged Swallow - *Steigdopteryx ruficollis*
Gray-breasted Martin - *Progne chalybea*
Brown-chested Martin - *Progne tapera*
White-winged Swallow - *Tachycineta albiventer*
Barn Swallow

**WRENS**
Thrash-like Wren
Gray-mantled Wren
Rufous Wren
Sharpe's (Sepia-brown) Wren
Plain-tailed Wren
Coraya Wren
House Wren
Mountain Wren
Sedge (Grass) Wren
White-breasted Wood-Wren
Gray-breasted Wood-Wren
Scaly-breasted (Southern Nightingale) Wren
Wing-banded Wren
Musician Wren

**DIPPERS**
White-capped Dipper

**DONACOBIUS**
Black-capped Donacobius

**THRUSHES AND ALLIES**
Andean Solitaire
Spotted Nightingale-Thrush
Swainson's Thrush
Pale-eyed Thrush
Hauxwell's Thrush
Lawrence's Thrush
Black-billed Thrush
Great Thrush
Glossy-black Thrush
White-necked Thrush

**WAGTAILS AND PIPITS**
Paramo Pipit

**NEW WORLD WARBLERS**
Tropical Parula
Blackburnian Warbler
Blackpoll Warbler
Black-and-white Warbler
American Redstart
Canada Warbler
Slate-throated Redstart
Spectacled Redstart
Black-crested Warbler
Russet-crowned Warbler
Three-striped Warbler

**BANANAQUIT**
Bananaquit

**TANAGERS AND ALLIES**
Magpie Tanager
Black-capped Hemispingus
Black-eared Hemispingus
Gray-hooded Bush Tanager
Cinereous Conebill

**TROGLODYTIDAE**
Hirundo rustica

**DIPLOMENA DIPLOMENIDAE**

**TURDIDAE**

**CINCLUDIAE**

**DONACOBIIDAE**

**PARULIDAE**

**THRAUPIDAE**

**COEREBIDAE**
Blue-backed Conebill
Capped Conebill
Common Bush-Tanager
Yellow-throated Bush-Tanager
Fulvous Shrike-Tanager
Flame-crested Tanager
Fulvous-crested Tanager
White-lined Tanager
Masked Crimson Tanager
Silver-beaked Tanager
Blue-gray Tanager
Palm Tanager
Blue-and-yellow Tanager
Hooded Mountain-Tanager
Lacrimose Mountain-Tanager
Scarlet-bellied Mountain-Tanager
Blue-winged Mountain-Tanager
Grass-green Tanager
Buff-breasted Mountain-Tanager
Fawn-breasted Tanager
Orange-eared Tanager
Turquoise Tanager
Paradise Tanager
Green-and-gold Tanager
Golden Tanager
Saffron-crowned Tanager
Flame-faced Tanager
Yellow-bellied Tanager
Spotted Tanager
Bay-headed Tanager
Blue-browed Tanager
Blue-necked Tanager
Masked Tanager
Beryl-spangled Tanager
Blue-and-black Tanager
Black-capped Tanager
Opal-crowned Tanager
Black-faced Dacnis
Yellow-bellied Dacnis
Blue Dacnis
Green Honeycreeper
Red-legged Honeycreeper
Purple Honeycreeper
Golden-collared Honeycreeper
Swallow Tanager
Yellow-shouldered Grosbeak
Grayish Saltator
Buff-throated Saltator
Slate-colored Grosbeak

**SPARROWS AND SEEDEATERS**
Plumbeous Sierra-Finch
Black-and-white Seedeeater
Chestnut-bellied Seedeeater

**EMBERIZIDAE**
Parkerthraustes humeralis
Saltator coerulescens
Saltator maximus
Saltator grossus

Phrygilus unicolor
Sporophila luctuosa
Sporophila castaneiventris
Chestnut-bellied (Lesser) Seed-Finch  
Plain-colored Seedeater  
Glossy Flowerpiercer  
Black Flowerpiercer  
Deep-blue (Golden-eyed) Flowerpiercer  
Bluish Flowerpiercer  
Masked Flowerpiercer  
Red-capped Cardinal  
Pale-naped Brush-Finch  
Yellow-breasted (Rufous-naped) Brush-Finch  
Slaty Brush-Finch  
Stripe-headed Brush-Finch  
Yellow-browed Sparrow  
Rufous-collared Sparrow

**GROSBEAKS AND ALLIES**  
Summer Tanager  
Scarlet Tanager  
Golden-bellied (Southern Yellow) Grosbeak  
Blue-black Grosbeak

**TROUPIALS AND ALLIES**  
Oriole Blackbird  
Giant Cowbird  
Epaulet (Moriche) Oriole  
(Northern) Mountain Cacique  
Solitary Black Cacique  
Scarlet-rumped (Subtropical) Cacique  
Yellow-rumped Cacique  
Russet-backed Oropendola  
Crested Oropendola  
Casqued Oropendola

**SISKINS AND ALLIES**  
Thick-billed Euphonia  
Golden-rumped Euphonia  
Golden-bellied (White-lobed) Euphonia  
Bronze-green Euphonia  
White-vented Euphonia  
Orange-bellied Euphonia  
Rufous-bellied Euphonia  
Blue-naped Chlorophonia  
Hooded Siskin  
Olivaceous Siskin
