

A Tropical Birding SET DEPARTURE tour

COLOMBIA: Northern

Santa Marta Antpitta at Sierra Nevada National Park (Jose Illanes)

TOUR LEADERS: Jose Illanes & Keith Barnes REPORT and PHOTOS BY: Jose Illanes

TOUR SUMMARY:

DAY 1 (of birding) March 11: Isla Salamanca National Refuge. After all meeting at the hotel in Barranquilla the previous evening and having dinner together, we were now ready to bird! On this trip we also had TB guide and owner Keith Barnes along with us to help some cool birds and provide us with his wonderful company too.

We started out at Isla Salamanca Wildlife Refuge, a 45-minute drive from our hotel. We took a boxed breakfast in the field with hot coffee that our driver Virgilio brought for us. During breakfast, we found two major targets, Sapphire-throated and Sapphire-bellied Hummingbirds, which came in to feed on a local flowering tree. After having breakfast, we birded around this beautiful natural reserve, surrounded by three different species of mangroves, where we found Panama Flycatcher, Bicolored Conebill, Russet-throated Puffbird, **Black-crested Antshrike** and a friendly **Straight-billed Woodcreeper**. Later, we went to bird on the boardwalk that weaves through the mangrove forest. Along there, we found many Prothonotary Warblers, as well as Pied Water-Tyrant, Red-rumped Woodpecker, a very tame Pied Puffbird and Yellow-chinned Spinetail near the water's edge. As a result of some concerted scanning around the water, we also encountered Tricolored and Little-blue Herons, Wattled Jacana, Bare-faced Tiger-Heron and spot four species of kingfishers: Green, Ringed, Amazon and American Pygmy Kingfishers. Other common species in the area were Snail Kite, Whimbrel, Black-necked Stilt, Great-tailed Grackle, and Solitary and Spotted Sandpipers.

Russet-throated Puffbird from the "KM 4 Road" (Jose Illanes)

Later in the morning, we went to bird the "KM 4 Road", just a short distance from where we had been earlier. This was extremely productive, with Stripe-backed and Bicolored Wrens, Brownthroated Parakeet, Olivaceous Saltator, Bare-faced and Glossy Ibises, Great Kiskadee, Boatbilled Flycatcher, a pair of Vermilion Flycatchers and Striated and Cocoi Herons too.

This quiet dirt road also brought us Bronzed Cowbird, Carib Grackle, Ruddy Ground-Dove, Scaled Dove, Red-crowned Woodpecker, Lesser Yellow-headed Vulture, Crested and Yellowheaded Caracaras, and the marsh areas held White-headed Marsh-Tyrant, Yellow-hooded Blackbird, Purple and Common Gallinules, Southern Lapwing, and Limpkin. Then, just as we were getting ready to leave, Keith noticed a Pearl Kite.

After that, we drive a few hours and took lunch in a restaurant where we added more birds like, Crimson-backed Tanager, Orange-chinned Parakeet, Gray-Seedeater, Broad winged Hawk and **Common Black-Hawk** while waiting for our meals. Following lunch, we drove towards *Riohacha* the northernmost town in Colombia. Unfortunately, there were some local community demonstrations along the road, which delayed our birding schedule. However, once passed the protests, we found Green-rumped Parrotlet, Glaucous Tanager, Bare-eyed Pigeon, Bluecrowned Parakeet, Shinning-green Hummingbird, Trinidad Euphonia and Rufous-vented **Chachalaca** before arriving at the hotel in *Riohacha* late in the day.

Bicolored Wren from La Jorara (Jose Illanes)

DAY 2 (March 12): Guajira Penisula (Flamencos National Wildlife Refuge) and Las Gaviotas **Road.** On this day, we birded around *Flamencos National Wildlife Refuge* near *Camorones* village, which is not that far from Riohacha town.

Once again, we took a field breakfast (this is quite normal and regular in *Colombia!*). For this part, we had a local guide Johnny who came with us to find some of the dry, scrubby habitat species.

While we were having our breakfast, we found some of these, most notably a pair of male and female **Vermilion Cardinals**, which was a very good start! Once we finished our food, we went to bird along one of the trails used by the local people, where we found **Buffy Hummingbird**, Crested Bobwhite, and a pair of Rufous-vented Chachalaca. We were then quickly distracted by the excited voice of Keith, who'd found a sleeping **Northern Tamandua**. Further along the same trail we also picked up a a few local species like White-fringed Antwren, Northern Scrub Flycatcher, Red-billed Emerald, Black-faced Grassquit, Pileated Finch, Pale-tipped and Slender-billed Tyrannulets, a cute Chestnut Piculet, Tocuyo Sparrow, Rufous-tailed Jacamar, Pale-legged Hornero, Trinidad Euphonia, Pearly-vented Tody-Tyrant, and also the extremely handsome White-whiskered Spinetail. We also found another major target, Black-backed Antshrike.

Black-backed Antshrike from Flamenco National Wildlife Refuge (Jose Illanes)

After this successful morning, we went to visit a place with feeders, which brought welcome respite from the heat. This led us to better views of **Buffy Hummingbird** but also **Yellow Oriole**, Pileated Finch, Scaled Dove, Vermilion Cardinal, and Red-crowned Woodpecker.

An **Orinocan Saltator** also visited the feeders several times too, a species that we'd been searching in vain for that morning! On the way to lunch, we checked the shoreline and found Lesser Black-backed and Laughing Gulls, Royal, Sandwich and Caspian Terns, Black Skimmer, Magnificent Frigatebird, Brown Pelican, Great, Snowy and Reddish Egrets, White Ibis, and, best of all, the vibrant Scarlet Ibis.

After lunch, we continued our journey, stopping for half a dozen **Double-striped Thick-knees**. Before leaving this beautiful region, we stopped one more time at the edge of a dry and green area, where we picked up Ferruginous Pygmy-Owl, Golden-fronted Greenlet, Rufous-tailed Jacamar, Buff-breasted Wren, another Sapphire-bellied Hummingbird, Glaucous Tanager and the cute, **Yellow-breasted Flycatcher**. All of this happened before we got to our lodge in *Jorara*. Once we got there, we had time for some Colombian beer to celebrate our successful day and took a delicious dinner.

Orinocan Saltator from Flamenco National Wildlife Refuge (Jose Illanes)

DAY 3 (March 13): Las Gaviotas Road to El Dorado. Unfortunately on this day, we received further bad news that local people had blocked a road so that we couldn't go to our first planned birding destination. However, this didn't stop us from birding, and instead we went to bird along Las Gaviotas Road, which offered us similar birding to what we had planned originally.

Birding this forested habitat yielded Forest Elaenia, Blue Dacnis Brown-capped Tyrannulet, Crimson-backed Tanager, Black-headed Tody-Flycatcher, and we also managed great looks of Southern Bentbill, White-necked Puffbird and Lance-tailed Manakin at display site.

Lance-tailed Manakin from Las Gaviotas Road (Jose Illanes)

Birding further along the same road, we managed to see Military Macaw flying passed, and a small feeding flock brought us Trinidad and Thick-billed Euphonias, Black-whiskered Vireo, Yellow-rumped Cacique, Bright-rumped Attila, White-winged Becard, Streak-headed Woodcreeper, and Lesser Kiskadee. We also found Whooping Motmot and the shy and skulking White-bellied Antbird.

After such a productive morning, we returned to the lodge to have lunch. In this area we also encountered Plain-breasted Thrush, Bicolored Wren, and Orange-crowned Oriole. After lunch, we drove to Minca and exchanged vehicles for the epic drive up to El Dorado Lodge, an incredible lodge with an incredible view in the Santa Marta Mountains. We arrived late in the day and soon did our checklist, took dinner, and retired for the night, with an early morning on the cards for the following day.

White-bellied Antbird from Las Gaviotas Road (Jose Illanes)

DAY 4 (March 14): Sierra Nevada National Park and El Dorado Lodge. Today we started very early from the lodge and took the usual breakfast again. Our reason for the early start was to reach the high point where we needed to bird at dawn, the best time for getting some of the key species. The distance to that point is not far, but the road conditions means that the journey took a couple of hours! This meant that we were traveling for much of the journey in darkness. As we traveled during this period a significant call was heard, which led to us seeing a wonderful Stygian Owl that gave us great looks. The front vehicle also saw a Band-winged Nightjar later on. Once we arrived on the road along the Santa Marta Mountains ridge, we were greeted by very windy conditions, making the birding a little more difficult than hoped. However, that did not stop us from picking up some stellar Santa Marta specialties, like a Santa Marta Brushfinch that came in to check us out while we ate breakfast in the field. After breakfast, we took a short walk, where we located Santa Marta (Hermit) Wood-Wren, Flammulated Treehunter, and **Scarlet-fronted Parakeet**. However, the biggest surprise was getting close and brilliant views of **Sierra Nevada Antpitta**, a recent split from *Rufous Antpitta*, and now a local endemic species. Another walk provided us with a feeding flock that held **Streak-capped Spinetail, Cinnamon** Flycatcher, Santa Marta Warbler, Mountain Elaenia, Yellow-crowned Redstart and the much wanted Black-checked (Santa Marta) Mountain-Tanager. While walking this same road, we also found Yellow-bellied Chat-Tyrant, Great Thrush, White-throated Tyrannulet and the endemic Rusty-headed Spinetail.

Black-cheeked Mountain-Tanager from Sierra Nevada National Park (Jose Illanes)

After such a wonderful morning, we went to bird in the lower valley of the park, which brought us a few more special birds of the area. We found species like Sierra Nevada Brushfinch, White-lored Warbler, Golden-breasted Fruiteater and Lined Quail-Dove. Besides them, we also spotted species like Black-throated Tody-tyrant, Black Flowerpiercer, Slate-throated Redstart, Blue-capped and Black-capped Tanagers, Golden-olive Woodpecker and we ended the day by seeing a White-tipped Quetzal by the parking lot.

DAY 5 (March 15): El Dorado Reserve area. We started the day by taking breakfast at the lodge, and as we were only birding very locally, did not need such an early start, for once! After a cooked breakfast we focused our attentions on the lodge feeders, which comprise of both hummingbird feeders and fruit feeders. The former attracted Crowned Woodnymph, Lesser and Brown Violetears, and the most wanted of them all locally, a White-tailed Starfrontlet. Meanwhile, the fruit feeders produced observations of Bay-headed, Blue-capped and Black-capped Tanagers and the outstanding Blue-naped Chlorophonia, a regular favorite amongst visitors for good reason! In the same general area we also saw White-sided Flowerpiercer, Band-tailed and Sickle-winged Guans and a bunch of Black-chested Jays.

A short walk on the lodge trails gave us some species we hadn't seen yet, like Masked Trogon, Slaty-backed Nightingale-Thrush, Black-hooded Thrush and the furtive Gray-throated Leaftosser.

Yellow-crowned Redstart from Sierra Nevada National Park and White-tailed Starfrontlet from El Dorado (Jose Illanes)

For the rest of the morning, we drove higher up from the lodge to visit the Santa Marta Antpitta feeding station. Timing is always important for this wild bird, and fortunately we made good time, and after a wait, in it came! A small feeding flock was also located in the same area, with Montane and Strong-billed Woodcreepers, Olive-striped Flycatcher, Montane Foliage-Gleaner, Barred Becard and migrant Blackburnian and Black-and-white Warblers.

After lunch, and a rest, we drove down from the lodge trying to get some of the species that we were still missing. Our first stop brought us Spotted Barbtail, Groove-billed Toucanet, the endemic Santa Marta Tapaculo and the scarce Moustached Puffbird, which was particularly great to see. Our last stop of the day was at our driver's new guest house. From the balcony there we were able to find Golden-crowned Flycatcher, Yellow-legged Thrush, Swallow and Black-headed Tanagers, Rose-breasted Grossbeak, Black-and-white and Yellow-bellied Seedeaters, Lesser Goldfinch and Yellow-backed Oriole. Finally, at dusk, we ended up seeing a couple mammal species, like Kinkajou, Gray-handed Night-Monkey as well as the endemic Santa Marta Screech-Owl, two of which were seen following initially difficulty in finding it.

Band-tailed Guan from El Dorado Reserve (Jose Illanes)

DAY 6 (March 16): El Dorado to Minca. Once again today we enjoyed a "late" breakfast, as we started by birding from the lodge again during our last spell at this wonderful location.

Our goal was to try and find some of the species that we were still missing, but we were also happy to get better views of the species that we had seen before too. Some of the birds we saw during this final stint there included Sierra Nevada and Santa Marta Brushfinches, Blackchested Jay, Masked Trogon, Band-tailed Guan, Bay-headed and Black-capped Tanagers, the striking **Blue-napped Chlorophonia** and same selection of *hummingbirds* at the feeders.

Once we were done with this place, we started to make our way down in elevation, birding the lower part of the valley as we did so. During our first stop at a nice clearing, after careful scanning, we found Crimson-crested Woodpecker, Spectacled Tyrannulet, Masked Tityra, **Dusky-capped Flycatcher, and Yellow-legged Thrush**. A short walk produced a second encounter with **Santa Marta Tapaculo** for those people who did not see it the first-time round. A pair of **Rusty-breasted Antpittas** also gave us a good look too. Much further down the road in an area of more disturbed habitat, a short stop brought us a couple more target species, such as **Santa Marta Antbird** and the shy **Santa Marta Foliage-Gleaner**. After that, we headed down towards *Minca* village, where we were staying, and to take lunch before our afternoon activities.

Photo page before: Blue-naped Chlorophonia at El Dorado Lodge (Jose Illanes)

Before and after lunch, we had the chance to enjoy the *hummingbird* feeders in Minca, where we saw White-necked Jacobin, Rufous-tailed and Steely-vented Hummingbirds, White-vented **Plumeleteer**, as well as **Black-chested Jay** at a fruit feeder. After a rest for a little while, we went to the upper part of the *Minca valley*. This area proved fertile ground, as found the shy **Rosy** Thrush Tanager, Rufous-and-white and Rufous-breasted Wrens, Chestnut-capped and Golden-crowned Warblers, Coppery Emerald and also got wonderful views of Golden-winged **Sparrow**. As it was then getting late, we went to get nice looks at the sunset on someone's property, and also to survey their flowers for another local specialty. As soon as we arrived there, we found a **Santa Marta Woodstar** feeding at a flowering *Inga* tree. As this was a very missable bird, we were only too happy to pick this one up in the nick of time. Further excitement was provided by seeing a pair of **Black-and-white Owls**, once it had got dark.

At the end of the day, we celebrated today's excellent birds, and the Rosy Thrush-Tanager in particular, with *Keith*, who believes this was his landmark 8000th species for the World!

Rosy Thrush-Tanager from the Minca area, a landmark 8000th species for Keith! (Jose Illanes)

DAY 7 (March 17): Minca area to Barranguilla. Unfortunately, this our last day of the trip. After breakfast at the hotel, we drove up the road for a while in pursuit of some final missing birds. This led us to a colorful **Keel-billed Toucan** feeding in a fruiting *Cecropia* tree, in addition to Crested Oropendola, Buff-throated and Streaked Saltators, the musical Rufous-and-white Wren, Cocoa and Plain-brown Woodcreepers, great looks at a Long-billed Gnatwren, Yellowbellied Elaenia, and Southern Beardless and Sooty-headed Tyrannulets. After that, we found another side road where we located Summer and Scarlet Tanagers, American Redstart, Striped-throated Hermit, Cinnamon Becard and a cute Scaled Piculet that came in well to playback. After such a productive morning, we went back to the sunset location of the evening before, where racked up a fine list of birds, including Gartered Trogon, White-lined, Bay-headed and Swallow Tanagers, Short-tailed Hawk, King Vulture and also managed great looks of a **Purple Honeycreeper** sitting in an open canopy. Our final major species came when we drove down the road in pursuit of Pale-breasted Spinetail and added that too. We returned to our Minco hotel for lunch, and to pack for the return drive to Barranquilla, where we spent the final night of the tour.

Golden-winged Sparrow from the Minca area (Jose Illanes)

After lunch, and driving to reconnect with our driver with our bigger vehicle, we drove to Universidad Del Norte on the outskirts of Barranquilla to look for the endemic Chestnut-winged Chachalaca. This city park is good for them, and we were delighted to find around a dozen of them during our short visit. Aside from the target chachalaca, we also found some noisy Bicolored and Stripe-backed Wrens, Boat-billed and Northern Scrub Flycatchers, Saffron Finch, and Yellow Oriole. As we needed to go back to the hotel for Covid tests in order to return to the USA, we had no further time for birding, but as we already had our target species this was not a major problem! After our tests, and negative results for everyone, it was time to end our time with a farewell dinner of delicious Colombian cuisine accompanied with one more local beer!

White-vented Plumeleteer from our Minca hotel (Jose Illanes)

The main special, or memorable, bird species that people highlighted from the trip were **Rosy** Thrush Tanager, Santa Marta and Sierra Nevada Antpittas, White-tailed Starfrontlet, Chestnut Piculet, Golden-winged Sparrow, White-tipped quetzal, Santa Marta Warbler, Sapphirebellied Hummingbird, Santa Marta Screech-Owl, Lance-tailed Manakin, White-bellied Antbird, Vermilion Cardinal, Santa Marta Tapaculo, Blue-naped Chlorophonia, Stygian Owl, Crimsoncrested Woodpecker, Chestnut-capped Warbler, Black-chested Jay, Pied Puffbird, Swallow, Bay-headed and Black-headed Tanagers, Rufous-tailed Jacamar and White-headed Marshtyrant! Our total number of species for the trip was 325 of which 14 were only heard.

Santa Marta Antbird from the Minca Valley (Jose Illanes)

BIRD LIST

Bird taxonomy follows Clements, J. F., T. S. Schulenberg, M. J. Iliff, S. M. Billerman, T. A. Fredericks, J. A. Gerbracht, D. Lepage, B. L. Sullivan, and C. L. Wood. 2022. The eBird/Clements checklist of birds of the world: v2022. Downloaded from http://www.birds.cornell.edu/clementschecklist/download/)

- (E) Indicates an Endemic Bird Species.
- (H) indicates a species that was HEARD only.
- **(G)** indicates a species recorded by the GUIDE ONLY.

White-headed Marsh Tyrant Arundinicola leucocephala Yellow-bellied Chat-Tyrant Ochthoeca diadema Bright-rumped Attila Attila spadiceus **Dusky-capped Flycatcher** Myiarchus tuberculifer Panama Flycatcher Myiarchus panamensis **Great Crested Flycatcher** Myiarchus crinitus **Brown-crested Flycatcher** Myiarchus tyrannulus Cattle Tyrant Machetornis rixosa Lesser Kiskadee Pitangus lictor

Great Kiskadee Pitangus sulphuratus
Boat-billed Flycatcher Megarynchus pitangua
Social Flycatcher Myiozetetes similis

Golden-crowned Flycatcher

Streaked Flycatcher

Myiodynastes chrysocephalus

Myiodynastes maculatus

Legatus leucophaius

Tropical Kingbird

Tyrannus melancholicus

Tyrannus dominicensis

VIREOS AND ALLIES VIREONIDAE

Golden-fronted Greenlet Pachysylvia aurantiifrons

Brown-capped Vireo Vireo leucophrys H

Red-eyed Vireo Vireo olivaceus
Black-whiskered Vireo Vireo altiloquus
CROWS, JAYS, AND MAGPIES CORVIDAE

Black-chested Jay

SWALLOWS

Cyanocorax affinis
HIRUNDINIDAE

Blue-and-white Swallow Pygochelidon cyanoleuca G

Brown-bellied Swallow

Southern Rough-winged Swallow

Gray-breasted Martin

Barn Swallow

Orochelidon murina

Stelgidopteryx ruficollis

Progne chalybea

Hirundo rustica

Barn Swallow Hirundo rustica
GNATCATCHERS POLIOPTILIDAE

Long-billed Gnatwren Ramphocaenus melanurus

Tropical Gnatcatcher

WRENS

TROGLODYTIDAE

House Wren

Polioptila plumbea

TROGLODYTIDAE

Troglodytes aedon

Stripe-backed Wren Campylorhynchus nuchalis

Tropical Birding - Trip Report

Bicolored Wren Rufous-breasted Wren Rufous-and-white Wren Buff-breasted Wren Gray-breasted Wood-Wren Hermit Wood-Wren (F)

Hermit Wood-Wren (E)

MOCKINGBIRDS

Tropical Mockingbird

THRUSHES AND ALLIES
Slaty-backed Nightingale-Thrush

Pale-breasted Thrush Yellow-legged Thrush Black-hooded Thrush

Great Thrush

SISKINS, & ALLIES
Blue-naped Chlorophonia

Trinidad Euphonia
