

A [Tropical Birding](#) SET DEPARTURE tour

## **ECUADOR: The Andes Introtour**

15<sup>th</sup> - 22<sup>nd</sup> June 2023

TOUR LEADER: José Illanes

Rose-faced Parrot from Amagusa Reserve

## TOUR SUMMARY: MAIN TOUR

June 16th: Zuro Loma, Yanacocha Reserve & Old Nono Mindo Road.

Hooded Mountain-Tanagers from Zuro Loma

After the group had all arrived the night before (or earlier), we all gathered in the morning and immediately set off for *Zuro Loma Reserve*, a 90-minute drive out of the capital city of *Quito*. After our arrival, the first things to pique our interest were the *hummingbirds*, with **Sparkling Violetear**, **Mountain Velvetbreast**, **Sapphire-vented Puffleg**, **White-bellied Woodstar**, **Tyrian Metaltail**, and the amazing **Sword-billed Hummingbird** (*photo next page*) all toing and froing from the feeders. Other nectar-eating birds, like **Masked**, **Glossy** and **White-sided Flowerpiercers** visited too. Meanwhile, fruit feeders alongside there attracted **Yellow-breasted** and **Gray-browed Brushfinches**, **Blue-capped Tanager**, and the stunning **Scarlet-bellied** and **Hooded Mountain-Tanagers** (*photo above*) too.

Other birds that revealed themselves near the feeders (but not at them), included **Superciliaried Hemispingus**, **Black-crested Warbler**, **Green-tailed Trainbearer**, **Purple-backed Thornbill**, and **Red-crested Cotinga**. The finale to our time there was provided by an **Equatorial Antpitta** that visited a nearby forest feeding station. We drive uphill a short distance from there to visit the *Yanacocha Reserve*, run by an Ecuadorian NGO, the *Jocotoco Conservation Foundation*, which protects a substantial proportion of land in Ecuador with a network of excellent bird reserves. We first checked out their fruit feeders and hummer feeders, finding the following birds to be in attendance: **Andean Guan**, **Black-chested Mountain-Tanager**, **Great Sapphirewing** and **Shining Sunbeam**. The remainder of the morning was spent along the flat trail there until lunchtime, picking up **Ocellated tapaculo**, **Smoky Bush-Tyrant**, and **Golden-breasted Puffleg** in the process. After a cooked meal inside the reserve, it was time to depart for lower altitudes, as we took the *Old Nono-Mindo Road* towards *Tandayapa Bird Lodge*, taking most of the afternoon to get there, as we made multiple stops along the way, seeing **Striped Treehunter**, **Plain-tailed Wren**, **Spectacled Redstart** the striking **Crimson-mantled Woodpecker**, beautiful **Turquoise Jay**, **Chestnut-bellied Chat-Tyrant**, **Sickle-winged Guan** and a jittery **White-capped Dipper** alongside the *Alambi River*. We pulled into the parking lot at *Tandayapa Bird Lodge* near dusk, ready after an eventful birding day to start sampling their famously good food, which comprises a mix of traditional Andean foods with modern western cuisine too.

The remarkable **Sword-billed Hummingbird** was seen at Zuro Loma

## June 17th: Tandayapa Bird Lodge &amp; the Tandayapa Valley.

The fruit feeders right beside *Tandayapa Bird Lodge* attracted this handsome **Rufous Motmot**

On this day we stayed close to “home”, birding around the lodge first thing, then taking a late breakfast, before spending the remainder of the morning higher up the *Tandayapa Valley*, before returning to the lodge for a decent lunch. After a middle of the day rest, we spent further time in the *Tandayapa Valley*, not far above the lodge, where the road birding is often superb, as proven on this day! Fresh coffee had been brewed for our pre-breakfast birding from the veranda of the lodge, where we watched the moth sheet first thing, which lured in birds like **Streaked-capped Treehunter**, **Plain-brown**, **Montane** and **Spotted Woodcreepers**, **Ornate** and **Golden-bellied Flycatchers**, **Tricolored** and **Chestnut-capped Brushfinches**, **Three-striped** and **Russet-crowned Warblers**, and a shy **Uniform Antshrike**. Then we took our breakfast, while watching the fruit feeders from the table as we did so. These were active during our visit, with **Golden**, **Flame-rumped** and **Golden-naped Tanagers**, **Red-headed Barbet**, **Rufous Motmot** (*photo above*), **Blue-winged Mountain-Tanager**, and **Toucan Barbet** all visiting during our breakfast vigil.

Last but not least were the *hummingbird* feeders, which were busy with attendees like **Green-crowned** and **Fawn-breasted Brilliants**, **Buff-tailed Coronet**, **Andean Emerald**, **Brown Inca**, **Lesser, Brown and Sparkling Violetears**, **White-necked Jacobin**, **Purple-throated Woodstar**, and the adorable **White-booted Racket-tail**, a constant crowd pleaser. *Tandayapa Bird Lodge* had kickstarted our time in the cloudforest perfectly, though it was now time to explore slightly higher elevations, a short drive up from the lodge. A **White-throated Quail-Dove** was seen walking along the road, and a small feeding flock yielded **Beryl-spangled Tanager**, **Flavescent Flycatcher**, **White-tailed Tyrannulet**, **Dusky Chlorospingus**, **Streaked Tuftedcheek**, **Capped Conebill**, **Blue-winged Mountain-Tanager**, and **Montane Woodcreeper**. The same general area also produced **Crested Quetzal**, **Masked Trogon**, **Turquoise Jay**, **Collared Inca**, **Tawny-bellied Hermit**, **Gorgeted Sunangel**, **Plate-billed Mountain-Toucan**, and a **Common Potoo** sleeping beside the road.

Road birding in the *Tandayapa Valley* was superb with this **Golden-headed Quetzal** encountered in the cloudforest there

We returned to the lodge for a cooked lunch. After that some went for a rest, while continued birding from the porch. After recharging our batteries, we did some more road birding within the cloudforest just above the lodge, where we saw **Golden-headed Quetzal** (*photo page 5*), **Scaled Fruiteater**, **Marbled-faced Bristle-Tyrant**, **Buff-fronted** and **Scaly-throated Foliage-Gleaners**, **Metallic-green Tanager**, **Tropical Parula**, **Brown-capped Vireo**, **Spotted Barbtail**, **White-throated Daggerbill**, **Nariño Tapaculo**, and the scarce **Cloud-forest-Pygmy-Owl**. We decided to stay until dark, this time at an area just below the lodge, where we spotted a **Rufous-bellied Nighthawk** and found a spectacular male **Lyre-tailed Nightjar** which responded well to playback to finish off a marvelous day in the cloudforests of the *Tandayapa Valley*.

#### June 18th: Rio Silanche Bird Sanctuary.

**Blue-necked Tanager** was seen in the lowlands and foothills

Having stayed close to “home” the day before, on this day we had one of the longest day trips of the tour, into the *Pacific* lowlands at *Rio Silanche*. We opted to take a packed breakfast and packed lunch, in this way avoiding getting up even earlier to have a cooked breakfast at the lodge before departure. We took our breakfast in the field, whilst getting our first birds along

the entrance road to the reserve, such as **Dull-colored Grassquit**, **Yellow-bellied and Variable Seedeaters**, **Pale-vented Pigeon**, a boisterous **Olivaceous Piculet**, **Buff-throated and Black-winged Saltators**, and some flying **Bronzy-winged Parrots**. We continued our journey towards the reserve, making plentiful stops along the entrance to see birds like **Blue-necked, Flame-rumped, Golden-hooded and Bay-headed Tanagers**, **Slaty Spinetail**, pair of calling **Gray-lined Hawks**, **Thick-billed Seedfinch**, **Sooty-headed and Chocó Tyrannulets**, the cute **Pacific Antwren**, **Yellow-tailed Oriole**, **Black-cheeked and Golden-olive Woodpeckers**, and the striking **Scarlet-backed Woodpecker**, **White-thighed Swallow**, **Ringed and Green Kingfishers**, **Rufous-tailed Jacamar**, **Little Cuckoo**, and **Red-billed Scythebill**. Once we arrived at the small reserve of *Rio Silanche* the action was instant, with a mixed feeding flock greeting us on arrival that held a Choco endemic, **Orange-fronted Barbet**, in addition to **Tawny-crested and White-shouldered Tanagers**, **Red-headed Barbet**, **Green Honeycreeper**, **Masked Tityra**, and the diminutive **Wedge-billed Woodcreeper**. We spent the latter part of the morning up on the canopy tower, observing other birds like **Collared Aracari**, **Chocó Toucan**, **Barred Puffbird**, **Double-toothed Kite**, **Short-tailed Hawk**, and the miniature **Black-capped Pygmy-Tyrant** (*photo below*), one of the smallest songbirds in the World. After lunch, we took a walk along some of the easy trails through the forest there, seeing **White-flanked Antwren**, **Checker-throated Stipplethroat**, **White-whiskered Puffbird**, and **Blue-tailed and White-tailed Trogons**.

**Black-capped Pygmy-Tyrant** was seen at *Rio Silanche*

Before leaving the reserve, we watched the *hummer* feeders, adding new species to the list, including **White-whiskered Hermit**, **Green Thorntail**, **Violet-bellied Hummingbird**, and **Purple-chested and Blue-chested Hummingbirds**. After another action-packed day, we returned to *Tandayapa Bird Lodge* for another fine meal and to go through our long list of sightings for the day!

#### June 19th: Mashpi.

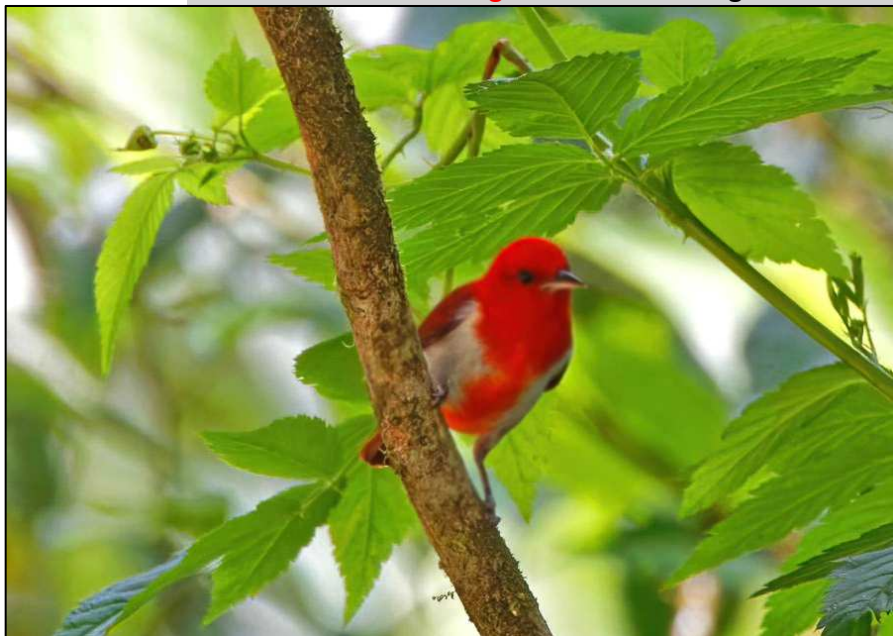

**Indigo Flowerpiercer** was among a long list of specialties seen around *Mashpi*

On this day we visited one of Jose's favorite birding places in Ecuador, the *Amagusa Reserve* near *Mashpi*, a small private reserve wonderfully run by a local family. We did a little bit of birding before we entered their property, finding some specialties right off the bat, like **Uniform Treehunter** and **Black Solitaire**, as well as **Sharpe's Wren**. Soon after we checked in at the fruit feeders at the reserve, quickly seeing some extremely confiding **Rose-faced Parrots** obliterating some hanging bananas.

**Scarlet-and-white Tanager** was an amazing find at *Mashpi* (photo by David Wright)

The list of birds at the feeders there was very impressive (as usual), with all of these noted there: **Glistening-green, Moss-backed, Flame-faced and Rufous-throated Tanagers, Crimson-rumped Toucanet**, along with more routine fare, like **Orange-bellied Euphonia**, and **Golden-naped, Palm, and Flame-rumped Tanagers**. The hummingbird feeders were no less dramatic, holding specialties of this Choco bioregion, like **Velvet-purple**

**Coronet, Violet-tailed Sylph, Empress Brilliant, Purple-bibbed Whitetip, and Brown Inca**. Some road birding nearby (only a short walk from the feeders) produced some other “goodies”, like **Orange-breasted Fruiteater, Indigo Flowerpiercer (photo page before), Pacific Tuftedcheek, Green-fronted Lancebill, Golden-winged Manakin, Brown-billed Scythebill, Black-billed Peppershrike, Choco Warbler, Swallow Tanager, and Bronze-olive Pygmy-tyrant**. A cooked lunch was taken inside the reserve, overlooking their feeders, and then we drove further along the *Mashpi-Guayavillas Road*, searching for more birds along this quiet, forested road. We found some other real standouts, not least a spectacular male **Scarlet-and-white Tanager (photo above)**, along with **Yellow-green Tanager**, two very rarely seen tanagers indeed. Some other scarcities included **Rufous-rumped Antwren, Gray-and-gold Tanager, Orange-fronted Barbet, Slaty-capped Shrike-Vireo, and Dusky-faced Tanager**. Some other highlights were **Blue-tailed Trogon, Choco Toucan, Maroon-tailed Parakeet, Yellow-throated Chlorospingus, Russet Antshrike, Purple Honeycreeper, and Scarlet-rumped Cacique**. After a real thriller of a day in the unique *Mashpi* area, we once again returned to *Tandayapa* for another night with plenty to reflect on.

### June 20th: Refugio Paz de Aves & the Upper Tandayapa Valley.

Today involved our earliest start, as we needed to arrive at dawn at a site in *Mindo*, to witness the daily displays of **Andean Cock-of-the-rocks**, something that no one would want to miss! After seeing eight different scarlet-and-black males displaying within the cloudforest the early start was quickly forgotten! Our next stop was to visit on the local male **Lyre-tailed Nightjar**, which was sleeping within view of the road as hoped. We also saw a jet-black male **Zeledon's Antbird** being fed and saw the scarce **Tyrannine Woodcreeper** in the same area.

It was then time for the traditional mid-morning brunch at *Refugio Paz de Aves* comprising of delicious *bolones* and *empanadas*, local food done very, very well, and washed down with Andean-grown coffee. We then spent much of the remainder of our time there searching for their famous antpittas. There were five possible species on offer, although seeing all five in one morning is actually not a given. We walked away with three and were very happy with the **Ochre-breasted**, **Moustached** (*photo below*), and **Chestnut-crowned Antpittas** seen! The fruit feeders and hummingbird feeders were also worth a look, and produced species like **Toucan Barbet**, **Golden and Golden-naped Tanagers**, **Blue-winged Mountain-Tanager**, **Purple-bibbed Whitetip**, **White-booted Racket-tail**, **Velvet-purple Coronet**, **Andean Emerald** and the spectacular **Violet-tailed Sylph**.

**Moustached Antpitta** was one of three antpittas scored at *Paz de las Aves*

We returned to *Tandayapa* for a late hot lunch (following our heavy meal mid-morning) and spent the afternoon in the *Upper Tandayapa Valley*. We started out there at the Mindo Cloudforest Foundation reserve of *Pacha Quinde*, where the highlights were **Masked Trogon** (*photo next page*), **Toucan Barbet**, and **White-winged Brushfinch**. After, we continued birding the *Upper Tandayapa Valley*, finding roadside **Crested and Golden-headed Quetzals**, and a flock with **Beryl-spangled Tanager**, **Dusky Chlorospingus**, **Capped Conebill**, **Green-and-black Fruiteater**, and the striking **Grass-green Tanager**. In the late afternoon we tried for one of the rarest species in the area and struck gold with a **Tanager Finch** to finish the day.

This male **Masked Trogon** was seen at *Pacha Quinde*

### June 21st: Milpe & Calacalí.

This was the final day of the main tour, and we made the very most of it, first dropping down into the foothills at *Milpe*, then driving into the highlands once more to *Quito* via *Calacali*, a dry and semi-arid area close to the capital. On arrival at *Milpe*, we checked the bustling hummingmer feeders, seeing the usual suspects, like **Green Thorntail**, **Crowned Woodnymph**, **White-necked Jacobin**, and **White-whiskered Hermit**. A feeding flock beside there held **Swallow**, **Blue-necked**, **Golden**, and **Ochre-breasted Tanagers**, and **Pale-vented Thrush**. Some noisy **Bronze-winged Parrots** were seen closeby also, and we had a fly over from a **Gray-headed Kite**. The fruit feeders attracted **Silver-throated Tanager**, **Thick-billed** and **Orange-bellied Euphonias**, and a handsome **Orange-billed Sparrow**.

After that we birded some of the easier trails within the reserve, finding some real crackers like the beautiful **Speckled Nightingale-Thrush**, **Collared Trogon** **Purple-crowned Fiery**, **White-bearded** and **Golden-winged Manakins**, **Broad-billed Motmot**, and the very rarely seen

**Crimson-bellied Woodpecker** (*photo below*) . Other highlights of our walk included **Brown-billed Scythebill**, **Tawny-breasted Flycatcher**, **Smoky-brown Woodpecker**, **Slaty Antwren**, **Choco Warbler**, and **Scaly-throated and Buff-fronted Foliage-Gleaners**. We took lunch at a wonderful local restaurant with bird feeders, *Mirador Rio Blanco*. After enjoying both the meal and the amazing landscapes behind the restaurant, we set off for *Quito*, stopping just outside of there at *Calacali*, virtually right on the equator itself. Only an hour's birding there was enough to add **Golden Grosbeak** (*photo next page*), **Blue-and-yellow Tanager**, **Common Ground-Dove**, **Black-tailed Trainbearer**, **Ash-breasted Sierra-finch**, **Band-tailed Seedeater**, and the striking **Golden-rumped Euphonia** to our list. We drove on to a hacienda style hotel near *Quito's* airport where we were to say goodbye to some of the group who were not able to join the extension into the *High Andes*...

This **Crimson-bellied Woodpecker** was a shock find at *Milpe*, a very rarely seen species throughout it's entire range

Golden Grosbeak was seen at Calacali, between Tandayapa Bird Lodge and Quito

## TOUR SUMMARY: THE HIGH ANDES EXTENSION

### June 22nd: Antisana National Park & Guango Lodge.

The evening before the group had stayed at a hacienda style hotel on the eastern side of *Quito*, conveniently located for our eastward journey on this morning into our first high Andean site, *Antisana National Park*. Our first stop near there produced highland species like **Brown-backed Chat-Tyrant**, **Plain-colored Seedeater**, and **Red-crested Cotinga**. We soon moved on to a mirador (viewpoint), where we saw our first **Andean Condors**, Ecuador's much wanted national bird. The lookout was also productive for other raptors, like **Variable Hawk** and **Black-chested Buzzard-Eagle**. We continued to drive ever higher in the national park, finding other classic high Andean birds, such as **Black-winged Ground-Dove**, **Ecuadorian Hillstar**, **Stout-billed** and **Chestnut-winged Cinclodes**, **Plumbeous Sierra-Finch**, **Andean Lapwing**, **Paramo Pipit**, **Plain-capped Ground-Tyrant**, **Grass Wren**, **Many-striped Canastero**, **Andean Tit-Spinetail**, **Tawny Antpitta**, **Carunculated Caracara** (*photo next page*), and the endangered **Andean Ibis**. We also visited a highland lake, *Laguna Mica*, which held some highland waterbirds, like **Slate-colored**

**Coot, Andean Teal, Andean Duck, Silvery Grebe, and Andean Gull.** We retreated and took lunch just outside the park in a local restaurant around which we found **Black-billed Shrike-Tyrant, Black Flowerpiercer, Tyrian Metaltail, Shining Sunbeam,** and the largest hummingbird of them all, the impressively large **Giant Hummingbird.** After lunch we headed to our next destination, *Guango Lodge* on the other side of a high mountain pass at *Papallacta*. We made a stop at the pass but could not find anything of note and so carried on to *Guango*, getting there in time to admire some of their resident hummingbirds, like **Buff-tailed and Chestnut-breasted Coronets, Tourmaline Sunangel, Long-tailed Sylph,** and the cute **White-bellied Woodstar** to end our first memorable day in the *High Andes*.

**Carunculated Caracaras** were quite approachable at *Antisana National Park*

## June 23rd: Guango Lodge and Cayambe-Coca National Park.

Guango Lodge once again proved itself to be one of the most reliable places to see (and see well) **Turquoise Jays!**

And so, all-too-soon, the final day's birding had arrived, and we made the most of it by covering Guango Lodge and the nearby very high elevation site of *Papallacta*, before returning to *Quito* for the final night of the tour. We started out by visiting the blind at *Guango*, which is at its very best at dawn, when the birds come to pick off the moths that have been attracted to the lights overnight. Once they are gone, the birds move away. More than ten species featured there, including 3 species of brushfinch (**Pale-naped**, **Chestnut-capped** and **Gray-browed Brushfinches**), 2 species of wren (**Rufous** and **Mountain Wrens**), and 2 species of jay (**Turquoise** -photo above- and **Green Jays**), as well as **Strong-billed Woodcreeper** and **Russet-crowned Warbler**. After the "blind birds" had moved away, we took a walk beside the rushing mountain river that borders the property, finding the hoped for **Torrent Ducks** and **White-capped dipper**, and lucking into a **Fasciated Tigger-Heron** too. This same walk also produced **Andean Guan**, **Mountain Cacique**, **Hooded Mountain-Tanager**, **Gray-headed Bush-Tanager**, **Capped Conebill**,

**Streaked Tuftedcheek, Pearled Treerunner, Beryl-spangled Tanager, and a friendly Slaty Brushfinch.** After that, we packed up and left *Guango Lodge*, with a packed lunch in tow to take in the field higher up. We drove to the entrance of *Cayambe-Coca National Park*, finding **Viridian Metaltail, Shining Sunbeam, Great Sapphirewing, Brown-backed and Rufous-breasted Chat-Tyrants**, and the extremely attractive **Rainbow-bearded Thornbill** feeding on some flowering highland shrubs. After taking our field lunch within magnificent mountain scenery, we headed up towards the pass at *Papallacta*, making a short stop beside *Laguna de Papallacta*, where we saw some more highland waterbirds, like **Andean Teal, Yellow-billed Pintail, Spotted Sandpiper**, and more **Slate-colored Coot**. Then we birded near the other entrance to *Cayamba-Coca National Park*, noting some of our final birds of the tour, such as **Plumbeous Sierra-finch, Chestnut-winged and Stout-billed Cincloides, Variable Hawk, Carunculated Caracara, Many-striped Canastero**, and **Tawny Antpitta** (*photo below*). Lower down from there we made one final stop where the highlights were **White-chinned Thistletail, Blue-mantled Thornbill** and the usually elusive **Purple-backed Thornbill**. Then it was time to retreat to *Quito*, staying at our now familiar hotel close to the airport for one final night to reflect on what had been a very successful *High Andes Extension*.

This **Tawny Antpitta** was belting out its familiar call in *Cayambe-Coca National Park*

From both the main tour and extension we had recorded **more than 370 species**, with the list of birds below picked out by the group as their particular favorites: **Crimson-bellied Woodpecker**, **Andean Cock of the Rock**, **Toucan Barbet**, **Scarlet and white Tanager**, **Crested Quetzal**, **Plate-billed Mountain-Toucan**, **Blue-winged Mountain- Tanager**, **Crimson-rumped Toucanet**, **Hooded Mountain-Tanager**, **Beryl-spangled Tanager**, **Cloud-forest Pygmy-Owl**, **Rose-faced Parrot**, **Torrent Duck**, **Velvet-purple Coronet (photo below)**, **Orange-fronted Barbet**, **Moustached Antpitta**, **Ocellated Tapaculo**, **Black Solitaire**, **Tanager Finch**, **Indigo Flowerpiercer**, **Black-capped Tanager**, **Crimson-mantled Woodpecker**, **Giant Hummingbird** and the mighty **Andean Condor**.

An Andean “belter”: **Velvet-purple Coronet** from Amagusa Reserve in the verdant Mashpi area

**BIRD LIST**

Bird taxonomy follows Clements, J. F., T. S. Schulenberg, M. J. Iliff, S. M. Billerman, T. A. Fredericks, J. A. Gerbracht, D. Lepage, B. L. Sullivan, and C. L. Wood. 2022.
