## TOUR SUMMARY

This was a short trip aimed at taking in some of the top highlights of Southeast Asia, namely diverse and mountainous northwest Thailand and the Angkor Wat area of northwestern Cambodia. It was a delightful trip on many scores. We racked up 389 species of birds. Just a few of many highlights included Hume's Pheasant, Giant Nuthatch, Red-faced Liocichla, Greater and Lesser Adjutants, Sarus Crane, Spotted Wood-Owl and Caspian Plover. We also enjoyed good hotels and fantastic food throughout this trip. Thai and Cambodia cuisines are both different, but both delightful.

For an immersive experience of this trip's highlights, check out the 7-minute video trip report:
