Photo Summary and photos by ANDRES VASQUEZ N., the guide for this tour

*It is really difficult not to feature a **Hyacinth Macaw** (photo above) on this cover page when it gave us such amazing photo opps.*

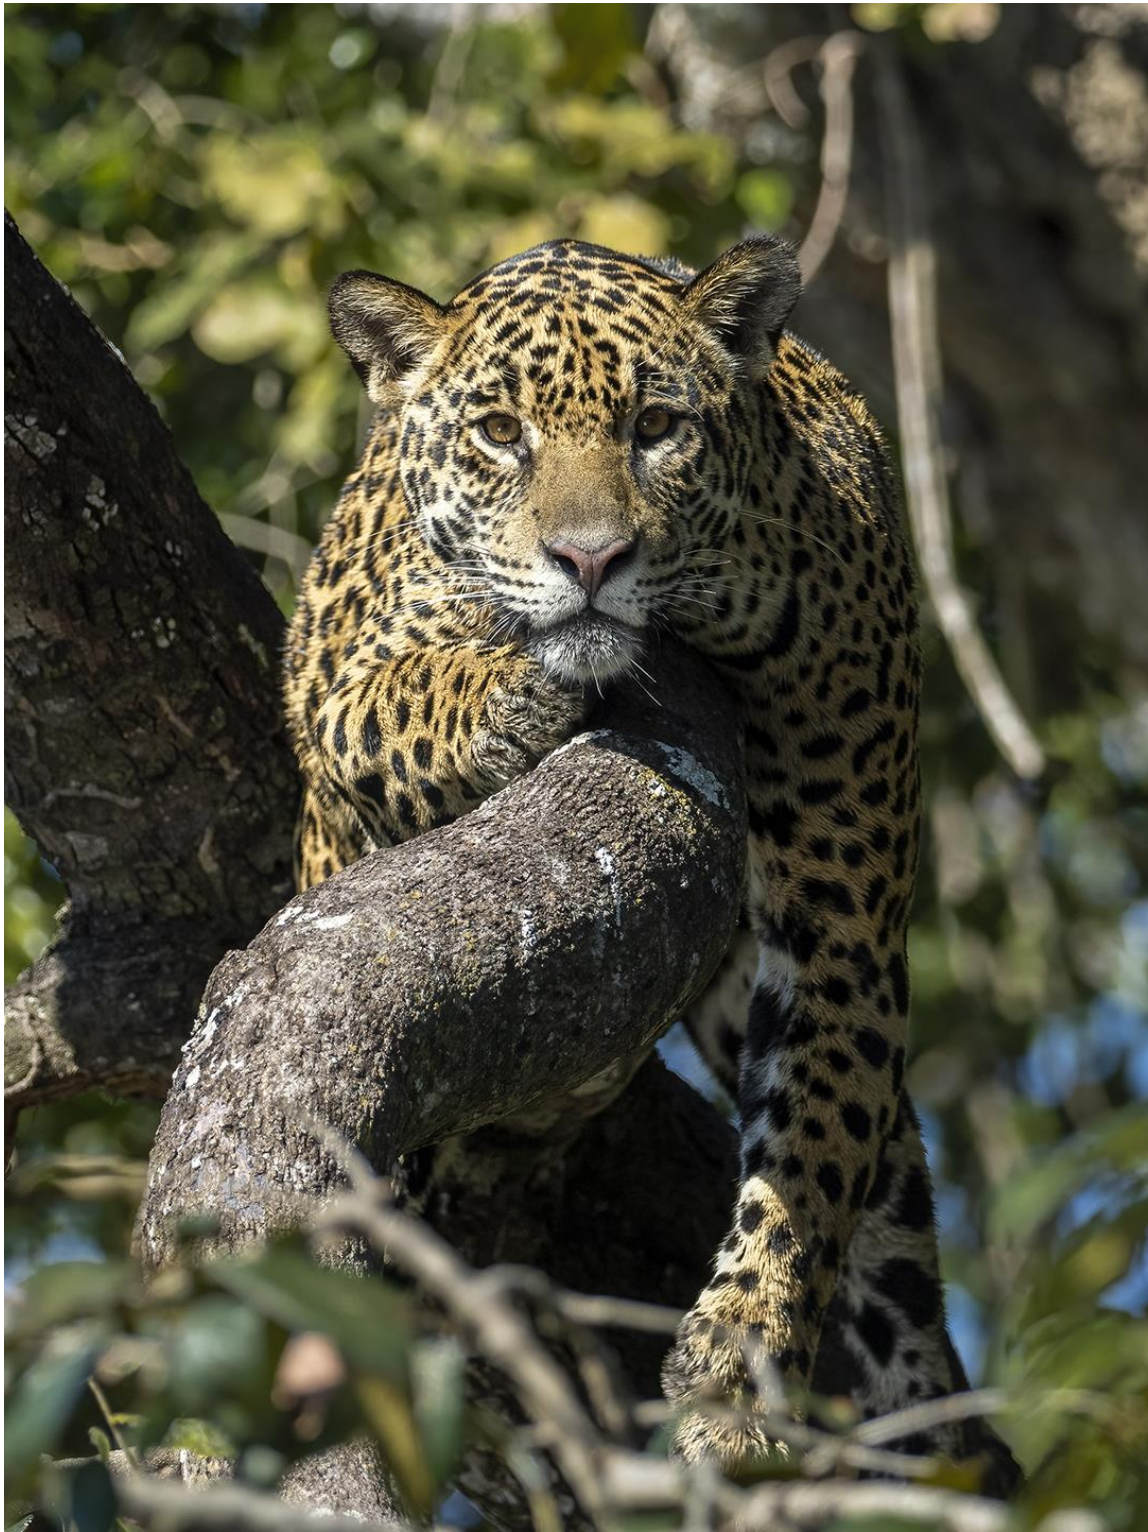

**OVERVIEW:** The following is a short summary of this year's PANTANAL and AMAZON Birding Tour I led this year and it is meant to be a complement to the VIRTUAL TRIP REPORT I created and uploaded to our Tropical Birding YouTube Channel. [Click here for this VTR: https://youtu.be/15F5nmAcq0A?si=5e55Xr-ZrHVQMcr0](https://youtu.be/15F5nmAcq0A?si=5e55Xr-ZrHVQMcr0)

The Pantanal and Amazon Set Departure is definitely one of the most amazing tours we run in South America for many reasons. The combination of many of the continent's best birds with some of its best mammals is unmatched. During this two-week-long trip we amassed a large list of sightings, out of which two favorites included this year sightings of **HARPY EAGLE** on two consecutive days from the towers of Cristalino Lodge in the Amazon, and five different **Jaguars** (most self-found) in the Pantanal. Those two alone already paid for the trip but other species mentioned by our super nice tour group during the final dinner included **Pompadour Cotinga**, **Hyacinth Macaw**, **Collared Crescentchest**, an array of **manakins**, **Banded Antbird**, **Rufous-necked Puffbird** (*photo below*), **Nanday Parakeet**, **Jabiru**, and **Amazonian Umbrellabird**, to name a few. I even got a lifer in the shape of the tiny **Rufous-sided Scrub-Tyrant**, which had eluded me for years!

It is worth pointing out that on this trip we covered three very well defined regions. We started by visiting the vast **CERRADO** near the small town of Chapada dos Guimaraes. Then we flew to the **AMAZON** where we spent 5 nights in the incredible (in terms of lodging, food, and of course wildlife) Cristalino Jungle lodge located in the southern part of the Amazon Basin. Finally we headed south through the famed Transpantaneira Highway visiting the seasonally flooded savanna of the **PANTANAL** where during the dry season large concentrations of water birds are amazing to see.

**FAVORITE PHOTOS OF THE TRIP:** The following are my favorite pics taken during the tour. They do not necessarily represent the rarest or the most common species; it is just my favorite selection.

*The piercing stare of the mighty JAGUAR (photo above) is mesmerizing and intimidating at the same time*

*Hyacinth Macaws (above) were very cooperative one afternoon at Porto Jofre. We had seen them much earlier on the tour but true photo opportunities only became good during the last afternoon in the Pantanal*

*Jacare Caimans (above) are abundant and tame. They are not aggressive humans as long as you keep your distance*

Cannot help posting another of the many views we got of **Jaguars** (*above*). This one was walking along the shoreline of the river parallel to us as we floated down the river following it.

The alien-looking **Jabiru** stork (*above*) needs to always be featured in any report.

*Campo Flickers (above) are very colorful and attractive. They often sit on top of termite mounts*

I was very happy to see these **Nanday Parakeets** (*above*) in their native range. They are rare and sporadic in the Pantanal. We initially had a quick and fairly distant flight view of these flock but later in the afternoon the flock circled back towards us and we got great views

*The canopy tower of Cristalino Jungle Lodge is the best place I know to see the scarce **Yellow-shouldered Grosbeak** (above), an Amazonian specialty stays high in the canopy.*

*The blinds in front of the poçinhas (water drips) at Cristalino are great to see and photograph some difficult birds like this **White-winged Shrike-Tanager** (above) which is normally hard to see.*

One night we were taken by our local guide to a stake-out he had for this **Long-tailed Potoo** (*above*). Otherwise it would be extremely hard to find

*Spangled Cotingas (above) normally are canopy birds but, for some strange reason, this individual sat for the longest time in the mid-levels of a tree in an open area. It seemed like it was possibly ill, or just resting.*

We got the 5 resident South American Kingfishers in one morning, **American Pygmy** (above) was the most cooperative

The more reclusive *Green-and-rufous Kingfisher* (above) was the most rewarding

The gaudy **White-bellied Parrot** (*above*) put on a show at close range from the tower of Cristalino

One of my favorite birds from the southern Amazon is Blue-cheeked Jacamar (*above*). I have seen it every time I have visited the area but never this well.

*I really like this ambient shot of one of the big targets on a visit to the Amazon, the hulking Amazonian Umbrellabird (above). One of the participants did an amazing job spotting it.*

Another of my personal favorites this elusive and difficult Point-tailed Palmcreeper (*above*) which came down unusually low

*In the Cerrado we had impossibly close views of this Crested Black-Tyrant (above)*

*This Blue-winged Macaw (**above**) was spotted perched at eye-level and it stayed put for a long time which meant we got great views and photos*

*Collared Crescentchest* was one of the group's favorite birds of the trip, it came early on in the tour in the Cerrado habitat ([above](#))
