One of the large number of Peruvian endemics we found on this tour was this **Golden-collared Tanager** (photo above). Also one of the nicest and most colorful of the 69 species that we recorded from the tanager family

**OVERVIEW:** The following is a short summary of this year's PERU: MANU and MACHU PICCHU Birding Tour, and it is meant to complement to the VIRTUAL TRIP REPORT I created and uploaded to our Tropical Birding YouTube Channel. This tour is a blast of diversity in so many aspects – not just the birds, but also the culture, landscapes, elevation, temperature, and even the transportation. We recorded **597 species of birds** and over a dozen mammals which is huge for any birding tour. We managed to visit world heritage sites like **Machu Picchu** and **Cusco**; some participants that arrived early had a great time visiting the Saqsaywaman and Tambo Machay Ruins. The incredible Andes are a dreamlike backdrop for this tour with its many snowcapped mountains like the **Nevalo Veronica** (5682 meters / 18641.73 feet) that was our companion during various birding days near Cuzco; we also spent quality birding time on a boat ride in the **Pacific Ocean** looking for penguins and also in the Amazon lowlands enjoying dozens of macaws on a clay lick. Finally, it is worth mentioning that in order to accomplish all this we used a combination of planes, paddle canoes, motorized boats, trains, buses, the nice van of our beloved driver Daniel, and even a motorcycle-cart; walking and hiking were quite important activities as well to reach our targets.

*This was our transportation in and out of **Tambo Blanquillo Lodge** (photo above) in the Amazon lowlands*

I was very happy with the group of birders that I had the honor of guiding. It was a great combination of very experienced participants (happy at the end with 50+ lifers to add to their over 6k and 7k life lists) and some incredibly talented “new” birders that have only started birding a couple years back, plus a couple relaxed birders that were happy with not just the beautiful birds but also the not so colorful ones. Everybody got along very nicely and there was a great energy within the group.

The group in **Machu Picchu** enjoying one of the wonders of the World (photo above).

At the end of the tour, some of the favorite birds mentioned included **Bearded Mountaineer, White-tufted Sunbeam, Andean Ibis, Solitary Eagle, Chestnut-crested Cotinga**, 3 species of quetzal, **Buff-tailed Sicklebill, Many-colored Rush-Tyrant, Torrent Duck, Inca Tern, Humboldt Penguin, White-throated Jacamar, Blue-headed Macaw, Chestnut-bellied Mountain Finch**, and **Golden-collared Tanager**, among others. I personally was happy to get a few lifers in this tour since it was the first time I guided the full itinerary and there were various sites that were new for me. I got things like **Cuzco Brushfinch, Inca Wren, White-browed Tit-Spinetail, Ashy-breasted Tit-Tyrant**, and even a couple of nemeses like **Cerulean-capped Manakin, Urubamba Antpitta**, and the tiny and rare **White-cheeked Tody-Flycatcher**.

*This was a last-minute bird we managed to squeeze into the list at the end of the day we visited Abra Malaga: the localized endemic **White-tufted Sunbeam** (photo above)*

In terms of experiences, participants mentioned they loved the time in Machu Picchu, our local guide was a very nice person and a very enthusiastic leader. The boat rides along the oxbow lakes in the lowlands of the Amazon are idyllic and the birds that we found during those were superb. There was a demanding hike that we did in Abra Malaga (at about 14000ft) which is extraordinarily scenic, that proved to be a nice challenge to achieve; most participants did most of the hike and got most of the specialties of the area but surely the climb proved hard for a couple birders. The macaw clay lick was a bit slow during our visit since not many birds showed up; we did see dozens of macaws and other parrots but nature is nature and it was a little quiet this time. We were greatly surprised with the new sets of feeders at small reserves that local people have started to open along the Manu Road; there were tons of species we saw at the feeders that we did not find elsewhere.

Feeders provided much more than only common colorful species, there were also localized endemics there like this **Chestnut-breasted Mountain Finch** (photo above)

**ITINERARY** Note: we are going to rearrange the order of future trips.

21-Aug-23	Arrive to Lima
22-Aug-23	Early flight to Cusco, Huacarpay Lake and Sacred Garden
23-Aug-23	Cusco to the upper Manu Area (Wayqecha Lodge)

6-Sep-23	Aguas Calientes and return to Cusco
7-Sep-23	Flight to Lima, visit to Pucusana Island and late departure

**FAVORITE PHOTOS OF THE TRIP:** In the following pages you will find a SUMMARY of the best photos I managed to get during this tour but not a detailed narrative of the tour. As mentioned above, details of the tour with more photos and videos are available on the full VIDEO TRIP REPORT linked to this document that you can watch in our YouTube Channel by clicking here: <https://youtu.be/2348TiauvWs?si=jNmHCTfNfDv6VrE1>

The photos shown below are my personal favorite pics taken during the tour. They do not necessarily represent the rarest or the most common species; it is just my favorite selection. I will follow chronological order of the tour to have a certain correspondence with the itinerary shown above.

Endemic to Peru, this **Green-and-white Hummingbird** (photo above) was common at Sacred Garden feeders on our first birding day

*Bearded Mountaineer (above) was a big target for the first day of the tour.*

On day two we had great views of *Peruvian Sierra Finch* (*above*) on the way to Wayqecha Lodge.

Before reaching Wayqecha we got a flock with this beauty, **Golden-collared Tanager** (above).

Within the last half hour of light we got the hulking **Hooded Mountain Tanager** (*above*) coming to feeders at Wayqecha Lodge.

*Yungas Pygmy-Owl (above) was the very first bird we saw on day three.*

*Moustached Flowerpiercer (above) is arguably the nicest looking member of the genus.*

*It was the first time I had ever seen a **Grass-green Tanager** (*above*) at feeders.*

The upper Manu Road gave us the rare *Chestnut-crested Cotinga* (above).

*Band-tailed Fruiteater* (above) was also found in the upper Manu Road.

*Blue-banded Toucanet (above) was the main attraction on Manu Magic Feeders.*

Another set of feeders just above Cock of the Rock Lodge provided a ton of good birds like this **Golden-naped Tanager** (above)

Another of the visitors to Mirador la Union Feeders was the gorgeous *Versicolored Barbet* (above)

We started our birding on the first morning at Cock of the Rock Lodge with the namesake iconic bird, **Andean Cock-of-the-Rock** (above)

*I am really happy to get shots of skulking and hard to photograph birds. This was the case for the obscure **Slaty Gnateater** (above)*

Close up views are possible from the restaurant and cabins of Cock of the Rock Lodge, thanks to the feeders. **Golden-eared Tanager** (above) is one of the regular visitors.

At the base of the Andes, numbers of antbirds are prolific. **White-lined Antbird** (above) is among the more common ones in this area.

Even large species like **Blue-throated Piping-Guan** (*above*) visit feeders near Pillcopata.

*Scarlet-hooded Barbet* (*above*) is a hard bird to get in this tour, or it used to be I should say; now it visits often Pico de Hoz feeders.

*Just down the road from Pico de Hoz there is another set of feeders, Inkamazonia, where another great barbet shows up, the amazing **Lemon-throated Barbet** (above).*

*The true star of Inkamazonia is the quirky **Buff-tailed Sicklebill** (above)*

*I am particularly happy with the photo I managed of this **Yellow-crested Tanager** (above) which is featured on the species account on eBird and soon also Merlin.*

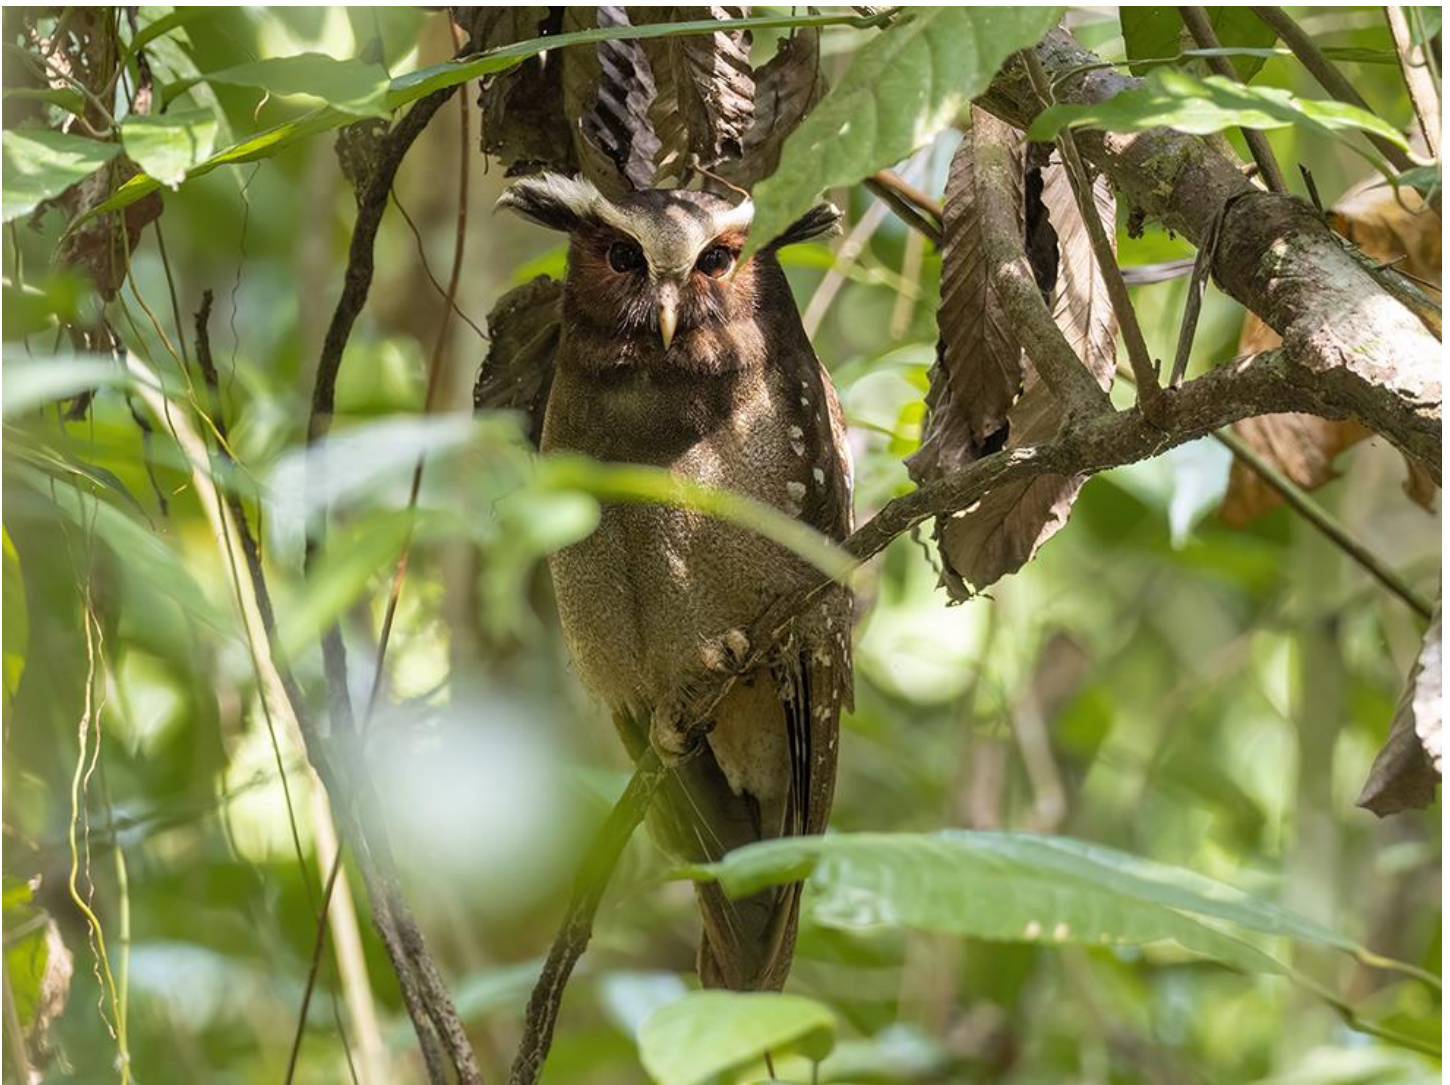

Close to sunset we visited a roadside palm grove where *Red-bellied Macaws* (*above*) come to roost.

*Blue-fronted Lancebill (above) is typically hard to get but close to dusk a couple individuals visited Inkamazonia feeders.*

*The lowlands of Manu are full of hidden surprises like roosting **Crested Owls** (above).*

*A pair of **Masked Tityras** (above) were nesting right next to the canopy tower at Manu Wildlife Center.*

Walking trails we found a bunch of great birds including this large **Red-necked Woodpecker** (above).

*The oxbow lakes hold families of **Giant Otters** (above)*

*The famous Blanquillo Clay Lick was a bit slow during our visit but nevertheless we got amazing views and photo opportunities of **Red-and-green Macaws** (above) eating clay out of the extensive wall.*

*These are the kind of photos I really enjoy getting: hard to photograph birds that hide in the forest interior. It can be very frustrating but also very rewarding. This is a **Rufous-capped Antthrush** (above) and I really like the natural background.*

One of the most iconic lowland Amazon species, *Hoatzin* (above).

After ascending back up the high Andes, we visited Piuray Lake where the shore-side reeds hold *Many-colored Rush-Tyrants* (above).

*Andean Geese (above) flying in a flock with late afternoon warm light was a very memorable moment.*

Common, widespread, never boring, **Burrowing Owl** (above)

*Mt. Sahuasiray (above) is the backdrop of our birding scene around Piuray Lake. The amazing Machu Picchu (below) is an absolute must visit location on Earth. We got lucky with the weather since I had rained the previous day and it was foggy the next one*

The Polylepis forest at about 14000ft of elevation provided some special birds like this **Tawny Tit-Spintail** (above)

We had a memorable experience witnessing **Torrent Ducks** (*above*) doing a prolonged display along the Urubamba River just below Machu Picchu on our way back to Aguas Calientes.

*The female **Torrent Duck** (above) seemed uninterested in the males since she was taking care of a youngster.*

*At the end of the tour, and just for a few hours, we visited the coast south of Lima where a completely new set of birds gave the list a boost, like the gorgeous **Inca Tern** (above).*

*We had to do two loops around the Pucusana Islet in order to get good views of the sought after **Humboldt Penguins** (above). This short time in the coast is well worth it and contrastingly different from the rest of the tour.*

**FINAL LIST:**

A total of **597** species of **BIRDS** were recorded on this tour. Out of this total, **54** were species Heard only (**H**) and 10 others were seen only by the Tour Leader (**L**). In terms of **MAMMALS**, we recorded **13** species. See the final list below:

**TINAMOUS**

- 1 H Great Tinamou
- 2 H Cinereous Tinamou
- 3 H Brown Tinamou
- 4 Undulated Tinamou
- 5 H Black-capped Tinamou
- 6 L Andean Tinamou

**SCREAMERS**

- 7 Horned Screamer

**DUCKS, GEESE, AND WATERFOWL**

- 8 Andean Goose
- 9 Muscovy Duck
- 10 Torrent Duck
- 11 Puna Teal
- 12 Cinnamon Teal
- 13 White-cheeked Pintail
- 14 Yellow-billed Pintail
- 15 Yellow-billed Teal
- 16 Andean Duck

**GUAN, CHACHALACAS, AND CURASSOWS**

- 17 Speckled Chachalaca
- 18 Andean Guan
- 19 Spix's Guan
- 20 Blue-throated Piping-Guan
- 21 Razor-billed Curassow

**FLAMINGOS**

- 22 Chilean Flamingo

**GREBES**

- 23 White-tufted Grebe
- 24 Least Grebe
- 25 Silvery Grebe (Andean)

**PIGEONS AND DOVES**

- 26 Rock Pigeon
- 27 Pale-vented Pigeon
- 28 Spot-winged Pigeon
- 29 Band-tailed Pigeon

**TINAMIDAE**

- Tinamus major*
- Crypturellus cinereus*
- Crypturellus obsoletus*
- Crypturellus undulatus*
- Crypturellus atrocapillus*
- Nothoprocta pentlandii*
